DOCUMENT DESCRIPTION: Internal Report - Asbestos Inventories

Owens-Illinois

ASBESTOS INVENTORIES

When the consolidation of operations is complete at Berlin, the annual requirement for Asbestos is estimated at 1,784 tons, or 446 tons per quarter.

The current inventory of Asbestos materials is as follows:

	Tons
4T Chrysotile (or equal)	284
6D Chrysotile	270
Amosite	1756

At a rate of 16 tons per week, the present rate of use, there is an 18 week inventory of 4T Asbestos.

After consolidation of operations, the Asbestos requirements at various rates of substitution follows:

% of Total # Batch Mtl.	Tons per Year	Tons per Quarter	Tons per Week
1%	357	89	6.86
5%	446	112	8.58
7%	624	156	12.00
10%	892	223	17.15
11%	981	245	18.87
15%	1338	335	25.73
20%	1784	446	34.31

If a formulation using 5% Amosite is produced, the requirement is 8.58 tons per week and the current inventory is good for 205 weeks. Assuming the rate of use for 6D at 10%, the current inventory will last for 16 weeks.
