DOCUMENT DESCRIPTION: Letter to Dr. Winslow from Fort Pitt Malleable Iron Co. RE National Safety News Article Draft

Fort Pitt Malleable Iron Company

WORKS:
McKEES ROCKS

Pittsburgh, Pa. March 22d, 1933.

My dear Dr. Winslow:

Please do not interpret the tardiness in answering your letter of February 9th, to any lack of interest or negligence on my part, but when I tell you I am affiliated with a couple little country banks, you can appreciate how busy they have kept me the past few weeks, which coupled with several trips out of the city, have occasioned the delay in more promptly replying to your communication.

With interest have I noted the draft of an article on safety provisions in air pressure abrasive blasting, for publication in the "National Safety News", and believe you have covered the matter nicely and I can see no reason why the manuscript should not be published as you have outlined it. The measure or statements made, appeal to me to be more in the nature of a description of blasting materials, sand blast equipment, and protective devices now in general use, with special emphasis on the necessity of dust prevention, and as such, apparently there could be no exception taken to their publication.

Asking your indulgence if I have been the cause of delay in completing your work on the matter, I am,

Very truly yours,

For - Dr. C-E.A. Winslow,
Yale University,
The School of Medicine,
New Haven, Conn.
