Location : Texas City, Texas

Date : December 28, 1962

Subject : SAFETY INDEX

To : General Operating Supervisors

The Plant Manager's Safety Board, at their December meeting, requested that we submit a definite proposal to the Board on the safety control program idea. The preliminary discussion of the program with the Board brought forth several objections; these are:-

1. The high cost of this type of sampling.
2. The statistical validity of the samples.

As I have not received all of your comments, there may be other points that need to be cleared up and answered. To do this and provide a definitive proposal, I would like to meet with you:-
