DATE : April 14, 1983 CC.

SUBJECT : Weekly Highlights - PCBs

REFERENCE :

TO : W. B. Papageorge

The industry/environmentalist task group from EDF, NRDC and CMA formally presented the proposed consensus rule to EPA for regulation of incidental PCBs.

Jackie Warren represented the environmentalist groups; CMA was represented by legal counsel and company representatives on the CMA panel, including Monsanto (JHC) and Dow. Several representatives of the trade press also attended the presentation and discussion at EPA headquarters.

EDF suggested that the Agency could accept the joint proposal of industry and environmentalists and publish the proposed rule in the Federal Register for comments. If no significant comments or changes occurred, the Agency could resolve this PCB issue efficiently and quickly by proposing it as a final rule.
