While these recommendations are based on years of experience, no guarantees are made in view of the many peculiarities that may center around one application as compared with another of similar nature. Consult with us for special or unusual services.

FACTORY is the target at which we're shooting, and though it's only nine months since the scrap began . . . production, the big gun of America, is scoring bulls' eyes.

Spouting from the assembly lines throughout the Nation are the planes, guns, ships and other essentials so necessary to this all-out war effort. To keep weapons pouring forth is the job that faces industrial America today.

Men are working longer, machines harder. Under this terrific strain wear equipment is bound to be more prevalent. Extra precautions must be taken or vital parts are apt to go, losing time our most precious asset in this life of mechanization.

Packings play their part in this gigantic production program. This advertisement is published as an industrial service to help save your time when packing selection must be made. If the problem is steam, this chart will guide you in making the proper Belmont Packing selection to meet your requirements.

THERE'S A BELMONT PACKING FOR EVERY SERVICE . . . Steam, Water, Oil, Gas, Acid, Alkalis, Ammonia. FORMS INCLUDE . . . Rings, Coils, Spirals, Reels, Sheets, Gaskets.

Belmont Packings are Sold by Authorized Belmont Distributors in Every Large Industrial Center
