

1. Value of products exported (item 11B in 1977) — This item is being dropped for 1978. Information collected for 1976 and 1977 provides a current basis for measuring the contribution of States to the United States total export activity.
2. Purchased services and capital expenditures by type (items 14 and 15, in 1977) — These items were deleted. They were added for 1977 at the recommendation of the Gross National Product (GNP) Improvement Committee for the purposes of establishing a quinquennial benchmark.
3. Purchased fuels (item 11A) — This item has been expanded to provide a separate line for reporting liquefied petroleum gases instead of including it with "other fuels." In addition, a column has been added to obtain fuel inventories by type. Both of these questions have been requested by the Department of Energy (DOE).
4. Nonpurchased fuels (item 11B) — A brief check box inquiry has been added at the request of DOE to determine the type of nonpurchased fuels used by manufacturing establishments.
5. The report form for 1978 has been expanded to 2 sheets to enable us to:
 - a. computer-imprint the data reported in 1977;
 - b. list related product class descriptions so as to minimize the need to refer to the instruction booklet.
6. The instruction manual has been revised from that used in the past. The principal revisions are:
 - a. The instructions have been designed for a group of related industries covered by the manual.
 - b. The list of products has been arranged in alphabetical sequence so that specified products can be more readily located. The product listing has been reduced by limiting it to the group of industries in which the establishments of your company are classified.

A sample booklet is enclosed to illustrate the format. The actual booklets, to be mailed to your company with the form MA-100, will correspond to the activities of your company. Additional booklets will be available upon request.

1978 ANNUAL SURVEY OF MANUFACTURES

ITEM 14A - Value of products shipped and other receipts during 1978

INSTRUCTIONS — Please read

1. **GENERAL** - Please account for the value of all products shipped from this establishment during the year. If your book records do not contain the requested information, reasonable estimates are acceptable.

- 2. VALUATION OF PRODUCTS** - The value of the products shipped and services performed should usually be based on the net selling value, f.o.b. plant, after discounts and allowances. Freight charges and excise taxes should be excluded. However, for some product classes, value of production or value of work done should be reported. See instruction manual for list of applicable product classes.

When transferring products to other establishments within your company, the shipping plant should assign the full economic value to the transferred products, i.e., include all direct costs of production and a reasonable proportion of all other costs and profits.

- 3. PRODUCTS BOUGHT AND SOLD WITHOUT FURTHER MANUFACTURE (RESALES).—**Products which you purchase and sell as originally purchased (not used in the further manufacturing, processing, or assembling of products made in this establishment) should be reported as "Resales." (Census product code 99983 6).

- #### 4. CONTRACT WORK

- a. Products made by others for you from your materials should be reported as if they were made in this establishment.

- b. Receipts for work or services that you performed for others on their materials (Census product code 93000 8) —** Report the amount that you received from "commission or contract work" on products that you made from materials owned by others. Do not report on the specific product lines for these products.

- 5. DERIVATION OF PRODUCT CLASSES - EXAMPLE** - In Item 18 of your 1977 Annual Survey of Manufacturers form you reported data for individual product lines. The values for these products have been assembled into groups of related products based on the first 5 digits of the product code. For example, assume that a company reported product lines for 1977. The products have been summarized based on the first 5 digits of the code as shown below.

Product data reported for 1977

- PRELISTED PRODUCT CLASSES.** — In addition to the product classes that you reported in 1977 we have prelisted the products and services that are generally made in your industry. Please review the entire list before completing the inquiry. If you produce products that are not prelisted, please refer to the alphabetic index in your instruction manual. If you cannot locate the descriptions of the products that you produce, please enter a description of your products in column (a), and enter their value in column (c). Report separately for each major kind of product.

(1) Review the report carefully to see that no items are omitted for the year being covered.
 (2) Calculate and enter figures for the four "reasonableness" checks below, and review the results.
 (3) Correct your report for any errors you find and explain unusual figures in remarks.

For most manufacturing establishments, the figures computed usually fall within the ranges indicated.

Part I — DETAILED INSTRUCTIONS

A. Who Should Report?

The annual survey of manufactures is conducted under an Act of Congress (title 13, United States Code) which requires that a report be filed by every manufacturer who receives a report form.

Since separate data will be published for industries, States, counties, cities, and standard metropolitan statistical areas, separate reports are required for each manufacturing establishment (plant).

1. An establishment is defined as a single physical location where manufacturing is performed. If your company operates at different physical locations, even if they are producing the same line of goods, a separate report must be filed for each location.

If your company operates in two or more distinct lines of manufacturing at the same location, a separate report should be filed for each activity. When actual book figures cannot be provided except at high cost to your company, reasonable amounts of estimating or prorating are acceptable.

2. The report form for any establishment not in operation should be returned with the notation as to its status in item 13A, Status of the Establishment. If the establishment had custodial employees, capital expenditures, inventories, or any shipments from inventories, these should be reported in the proper section.

B. What Activities Should Be Reported?

Each report should cover all the activities (manufacturing, fabricating, processing, and assembling) conducted within the establishment. The reported figures should also include activities such as the maintenance of plant and equipment, receiving, shipping, warehousing, storage, research, record-keeping, health, safety, cafeteria, and other services, when carried on at the same physical location by the manufacturing establishment. The manufacturing establishment reports should exclude sales branches, sales offices, research laboratories, retail stores, mining activities, and general administrative offices, if they are operated as separate establishments.

Please note that establishments engaged in the activities listed below are considered to be manufacturing establishments for the purposes of this survey:

Assembling from purchased components
Commission processing of materials owned by others
Job casting, stamping, and machining
Machine shops, including those operating on a job-order basis
Manufacturing and delivering ready-mixed concrete
Plating, galvanizing, polishing materials owned by others, etc.
Printing

Publishing: Book, periodical, etc.

Research and development, engineering and other services directly related to aerospace industries

Rebuilding on a factory basis

Sawmills

Wood preserving

C. What Period Should Each Report Cover?

Report data for the calendar year. If calendar year book figures are not available except at considerable cost, reasonable estimates will be acceptable.

However, if your fiscal year ends between October 31 and February 28, fiscal year figures will be acceptable for all items except employment, plant-hours, and payrolls. (Calendar year figures for these employment items should be available from your quarterly tax records.)

Indicate in the "Certification" the exact dates covered.

If there was a change in operator during the year or the establishment operated part of the year only, the data should apply to the period of operation by your company only. Report in item 13A any change and give the name and address of the previous operators or new operators.

FOR MULTIPLE-ESTABLISHMENT COMPANIES ONLY

D. How Should Multiple-Establishment Companies Determine Transfer Values of Products and Materials From One Establishment to Another ("Interplant Transfers")?

One of the important statistical measures of manufacturing activity is "value added by manufacture" which is derived by the Bureau of the Census from the figures reported for value of shipments, cost of materials, and inventories.

In order for statistics on value added and other subjects to be comparable from industry to industry or area to area, it is necessary that the operations of each establishment of a multiple-establishment organization be reported as though the establishment were a separate "economic" unit. This means that the value of interplant transfers within a company should include, in addition to direct costs of production, a reasonable proportion of "all other costs (including company overhead) and profits." The establishments receiving such transfers should report them as materials consumed (or inventories of materials, etc.) at the same value plus costs of freight and other direct handling charges. (See part I, item 5, Cost of Materials; item 7, Inventories; and item 14A, Total Value of Products Shipped.)

Part II — ITEMS ON THE REPORT FORM

- **Item 1A. Physical Location and Employer Identification Number** — Accurate and precise information on the physical location of each establishment is needed in order to prepare the tabulations of manufacturing activity in each State, county, and city. Each establishment has tentatively been coded geographically based on the address shown in item 1A of the report. Please be certain to review items 1A-a and 1A-b and make any necessary corrections or additions to the address shown, including the street name and number and ZIP code if shown.

Be certain to enter in item 1B, the current Employer Identification Number if it is different from the one printed in the address label. This information is needed so that the Bureau of the Census can avoid sending duplicate report forms for the same location. Our file of new business formations is based on the new Employer Identification Numbers issued each year. However, we exclude mailing report forms to new Employer Identification Numbers if we identify them as belonging to existing respondents.

- **Item 2. Number of Employees** — (You may follow the definition of employees specified by your State Employment Security Agency.)

Report employees at the establishment who worked or received pay for part of the pay period including the 12th of specified months (March, May, August, and November). Include all persons on paid sick leave, paid holidays, and paid vacation during these pay periods; exclude members of Armed Forces and pensioners carried on your active rolls. Include officers at this establishment, if a corporation; if an unincorporated concern, exclude proprietor or partners.

- **Items 2a–2e. Number of Production Workers** — Include workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, receiving, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., powerplant), recordkeeping, and other closely associated services. Exclude proprietors and partners.

- **Item 2f.** Divide the total on line e by 4 and enter the results on line f; divide by 4 even if you did not operate in all four periods.

- **Item 2g. All Other Employees** — Nonproduction personnel including those engaged in the following activities: supervision above working foreman level, sales (including driver salesmen), sales delivery (truck drivers and helpers), advertising, credit, collection, installation and servicing of own product, clerical and routine office functions, executive, purchasing, finance, legal, personnel (including cafeteria, etc.), professional and technical. Exclude proprietors and partners.

- **Item 3A. Payrolls** — (Follow the definition of salaries and wages used for calculating the withholding tax.) Report the gross earnings paid in each calendar year to employees at the establishment prior to such deductions as employee's social security contributions, withholding taxes, group insurance premiums, union dues, and savings bonds.

Include in gross earnings: commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind.

Include salaries of officers of this establishment, if a corporation; if an unincorporated concern, exclude payments to proprietors or partners.

Exclude payments to agricultural employees, fishermen, members of the Armed Forces, and pensioners carried on your active payroll.

- **Item 3B. Employer's Costs for Fringe Benefits (Supplemental Labor Costs)** (Exclude from items 3A and 3C.)

- **Item 3B-a. Legally Required** — Report payments for all programs required under Federal and State legislation such as: Federal Old Age and Survivors' Insurance, unemployment compensation, and workmen's compensation. Establishments located in Rhode Island, California, New York, and New Jersey should also include State temporary disability payment.

- **Item 3B-b. Payments for Voluntary Programs** — Include all programs not specifically required by Federal or State legislation whether initiated by the employer or established as a result of a collective bargaining contract. For programs financed jointly by employer and employee contributions, include only the employer payments. Include employer payments for: (a) insurance premiums on hospital and medical plans, (b) life insurance premiums, and (c) premiums on supplementary accident and sickness insurance. In reporting payments for insurance, report net payments, i.e., gross payments less any offsetting dividends, refunds, or other reductions in premiums.

Include also payments or allocations: (a) for all pension plans regardless of method of administration, (b) for supplemental unemployment compensation plans, (c) for welfare plans, (d) for stock purchase plans in which the employer payment is not subject to withholding tax, and (e) for deferred profit sharing plans.

The items listed in the paragraph above are generally considered as deferred rather than current income to employees and are not subject to withholding of income tax. If the payments or allocations by the company are made to a fund, payments to employees out of these funds should not be reported. However, payments made directly to retired employees or their survivors that do not pass through a fund should be included in item 3B-b.

Exclude expenditures not of the type listed above such as losses on company operated cafeterias and snack bars, cost of in-plant medical services, cost of free parking lots, discounts on employee purchases, cost of uniforms and other work clothing supplied to employees, and similar expenditures.

Exclude "Fringe Benefits" such as: payments for holidays, vacations, sick pay, bonuses, unused vacation, jury pay, night shift bonus, suggestion awards, and the payment on profit sharing and special stock purchase plans which are subject to withholding tax. This category of benefits should be reported as wages and salaries in item 3A, Payrolls.

FOR MULTIPLE-ESTABLISHMENT COMPANIES ONLY

If any of the items are maintained in your records only at the company level, allocate their costs to the manufacturing establishments. You may distribute the total on the basis of the ratio of the payroll of each manufacturing establishment to the total company payroll unless you have developed your own method of making such allocations. Specify the method used and the approximate portion that has been allocated in "Remarks."

- **Item 4. Plant Hours of Production Workers (by Quarter) —** Include all hours worked or paid for, except hours paid for vacations, holidays, or sick leave. If an employee elects to work during the vacation period, report only actual hours worked by such employee. Overtime hours should be reported as actual hours worked and not as straight-time equivalent hours.

FOR MULTIPLE-ESTABLISHMENT COMPANIES ONLY

- **Item 5. Cost of Materials Consumed —** If materials, parts, and supplies are received from other establishments of your company, costs should be checked against the values reported for the plant producing and transferring the goods (see section D above). The value should be "economic value," i.e., include in addition to the producing plant's direct cost of production a reasonable proportion of all other costs (company overhead) and profits. Freight and other direct handling charges should be added.

The following instructions pertain to both single establishment and multiple-establishment companies:

- **Item 5a. Cost of Materials, Parts, Components, Containers, etc., Consumed —** The delivered cost figures reported in item 5a should cover all raw materials, containers, scrap, and supplies, etc., which were: (1) put into production, (2) used as operating supplies, and (3) used in repair and maintenance.

If this establishment has products made elsewhere under contract and supplies the materials, report the cost of those materials in item 5a. Include the value of the specific products made in item 14A, Total Value of Products Shipped and Other Receipts. The amounts paid to other establishments for contract work should be reported on line 5e and should include also the freight charges for shipping the materials to the contract producer and the finished products to you.

Include only physical goods used or put into production.

Report total cost of the materials actually consumed or put in production during the year.

If book records are lacking, estimates may be made from purchases and other records. However, if purchases during the year do not significantly differ from the amounts actually used, purchase figures may be used in lieu of actual consumption. If for any major items consumption differs significantly from purchases, estimate consumption by adding beginning inventories to the amount purchased and subtracting end-of-year inventories for the item.

Cost is delivered cost — i.e., the amount paid or payable after discounts and including freight and other direct charges incurred by the establishment in acquiring the materials.

Include all materials received for consumption, i.e., purchases from other companies, transfers from other establishments of your own company, and withdrawals from inventories.

If the establishment produces items subsequently consumed in further production, report cost of original materials consumed only.

The following list is shown only as an example of types of items which should be included in item 5a.

Exclude services used or overhead charges, such as advertising, telephone, telegram and cable, insurance, developmental and research; services of engineering, management, marketing and other professional consultants, etc., unless charges for such services are included in the prices paid for materials.

Exclude also overhead items such as depreciation charges against plant and equipment; rent and rental allowances; interest payments, royalties, and patent fees.

Exclude materials, supplies, machinery, and equipment which were used in the construction of new structures or additions to your plant, or new machinery and equipment, and which are chargeable to fixed assets accounts. (These should be reported in item 8.) Exclude products purchased and resold without further manufacture or processing or assembly; their costs should be included in item 5b.

- **Item 5b. Cost of Products Bought and Resold as Such** — Report the cost of all products bought and resold in the same condition as when purchased and not made part of another product manufactured by this establishment. (Total sales value of all products resold is to be reported in item 14A on the line for "resales.")

- **Item 5c. Cost of Fuels Consumed** — Report the total amount actually paid or payable during the year for all fuels consumed for heat, power, or the generation of electricity. Do not include the estimated cost of fuels, such as sawdust or blast furnace gas, produced as a by-product of your manufacturing activities. Include anthracite and bituminous coal, coke, natural and manufactured gas, fuel oil, liquefied petroleum gas, gasoline, and all other fuels including purchased steam. For selected industries, such as Carbon Black, Blast Furnaces, and Coke Ovens some of the above fuel types may be used as raw materials as well as being consumed as fuels. In such cases, the cost of these fuel types used as raw materials should be reported in item 5a. The cost of these fuel types used as fuels should be reported in item 5c.

NOTE: Form MA-100 includes an inquiry on detailed fuels consumed in item 11A. Please make certain the total cost of fuels reported in item 11A agrees with the total reported in item 5c.

- **Item 5d. Cost of Purchased Electricity** — Report the total amount actually paid or payable for electric energy purchased during the year from other companies, or received from other establishments of your company. Exclude the value of electricity generated and used at this establishment.
- **Item 5e. Cost of Contract Work Done for You by Others (on Your Materials)** — If any contract work was done by others on materials furnished by your establishment, report the total payments made during the year for such work, including freight out and in. Exclude the cost of materials worked on, which should be included in item 5a.
- **Item 6. Quantity of Electricity** — All quantities for electricity should be reported in thousands of kilowatt hours.

- **Item 6a. Purchased Electricity** — Report (in thousands of kilowatt hours) the quantity of electricity for which cost is reported in item 5d.

- **Item 6b. Generated Electricity** — Enter the total quantity of electric energy generated in this plant (gross less generating station use) during the year although part of such energy may have been sold or transferred.

When totals are reported on this line, data relating to the activity of the power stations would also be included in other sections of this report. For example, the number of employees assigned to the power station, their wages and hours should be included in the figures reported in items 2, 3, and 4; and the cost of fuels used to generate electricity, in item 5c.

- **Item 6c. Electricity Sold or Transferred** — Enter the quantity of electric energy, which was also included in item 6a or 6b, but which was sold to other companies or transferred to other manufacturing or nonmanufacturing establishments of your company.

- **Item 7. Inventories of This Establishment at End of Year** — Report inventories at book values. Also report in item 12, Method of Valuation of Inventories.

Inventories of each establishment should be reported on a comparable basis from one year to the next. If there is a change in inventory valuation methods, please revise preceding years' figures and explain change in "Remarks." Where a company operates more than one manufacturing establishment, the inventories held by each establishment should be included on the report for that establishment.

If the prior year ending inventory figures are not pre-printed, please enter these figures.

COLUMNAR INSTRUCTIONS FOR ITEMS 8, 9, and 10

The intent of these items is to compile information on the buildings, structures, and equipment used directly or indirectly by the establishment to produce the goods and services reported in item 14A, Total Value of Products Shipped and Other Receipts.

Column (c) — Buildings and Other Structures — Include elevators, cranes, blast furnaces, brick kilns, fractionating towers, shipways and similar structures, as well as the usual factory office and warehouse type of buildings. Equipment that is an integral part of the building or structure such as elevators, ventilating shafts, and fractionating towers is to be included with the buildings and structure. Land on which the structures sit is not to be included, although the capitalized site improvements, such as roads, docks, tracks, parking lots, fences, and utilities, are to be included with the building and structures.

Column (d) — Machinery and Equipment — Include all production machinery and transportation equipment (automobiles, trucks, etc.). Include motors, lathes, punch presses, and similar equipment for use in production as well

as office equipment and machines; computers; furniture and fixtures for offices, cafeterias, dressing rooms; and warehouse equipment.

Include replacements as well as additions to new capacity.

► **Item 8. Depreciable Assets, Capital Expenditures, and Retirements**

- **Items 8a and 8e. Gross Value of Depreciable Assets** — Report the original cost of depreciable assets on the books of this establishment such as buildings, structures, machinery, and equipment for which depreciation or amortization reserves are maintained. Improvements and new construction in progress but not completed at year-end should be included in fixed assets at a value equal to the cumulative expenditures to the end of the year. This procedure should be followed even though the asset is not in use and is not yet being depreciated.

Used assets, including entire operating establishments acquired as part of a purchase, should be entered at the purchase value of these assets. Equipment or other assets transferred to this establishment from other parts of your company should be included at their transfer value as carried on the books of the company.

**FOR MULTIPLE-ESTABLISHMENT
COMPANIES ONLY**

If the establishment maintains a tenant relationship with the parent company or one of its subsidiaries and pays "rent" for the use of either plant or equipment, the gross value of the assets made available to the establishment should be reported as if the establishment owned them. (See instructions below for rental payments. In item 10 DO NOT report rent paid to the parent or subsidiary for assets reported in item 8.)

Please make certain that assets at the beginning of the year plus capital expenditures, less retirements equals assets at the end of the year. If this is not the case, please explain in the "Remarks."

- **Item 8b. Capital Expenditures for New Buildings and Machinery** — Include all outlays during the year for building and equipment that are chargeable to the fixed asset account, and for which depreciation or amortization reserves are maintained. Capital expenditures during the year should include only those capital outlays actually made during the year, not the final value of equipment put in place or the buildings completed during the year. Capital expenditures for long-term projects in process may be determined by the following computation: the cost of additions completed during the year, plus the construction in progress at the end of the year, minus construction in progress at the beginning of the year. For capital improvements or new additions in progress, please make certain that they are reported in the assets section, as well as the capital expenditure section of this report.

Report the expenditures during the year for new construction whether constructed on contract or by your own work force.

The reported value should include new equipment, and capitalized improvements and repairs to machinery and equipment whether purchased or produced by employees of your own company. Tools that are expensed are to be reported as part of the cost of materials, item 5 — Cost of Materials, Parts, etc.

- **Item 8c. Capital Expenditures for Used Buildings and Machinery** — Please enter the value of all equipment and buildings purchased during the year at their purchase price. For any equipment or structure transferred to the use of this establishment by the parent company or one of its subsidiaries, enter the value at which it was transferred to the establishment.

If this establishment changed ownership during the year, the cost of the fixed assets (building and equipment) should be reported under used capital expenditures.

- **Item 8d. Retirements and Disposition of Depreciable Assets During Year** — Report the gross value of assets sold, retired, scrapped, destroyed, etc. Where the complete operation or establishment changed ownership, the value of the assets sold should be reported at the original cost as recorded in the books of the seller. Include the retirements of any equipment or structures owned by the parent company that the establishment uses as if it were a tenant; these assets are also to be included in the value of assets in place.

- **Item 9. Depreciation Charges During Year** — Report depreciation and amortization charged during year against the assets included in item 8. Include the depreciation against fixed assets acquired since the beginning of the year and those sold during the year or retired and no longer carried on the books as of the end of the year.

- **Item 10. Rental Payments During the Year** — Report rental payments made to other companies for use of such fixed assets as buildings, structures, and equipment. If the parent or subsidiary rents property for use of this establishment and pays the rent, the rents should be reported in item 10, as if the establishment paid them.

Rental payments for buildings and structures, should not include the rental payment for the land on which they stand, if this separation can be made in a reasonable way.

Machinery and equipment rentals should not include computer time-sharing charges from computer service companies where the computer is not on site at the establishment. Include rentals for transportation equipment whether for use within the plant site as trucks, tractors, power lifts, railroad engines, cars, etc., or used for transporting materials or products into or out of the plant. Include rentals for the use of trucks, tractors, railroad flat cars, tank cars, automobiles, and airplanes. Include transportation equipment whether used for freight or by executive and sales personnel of the plant.

**FOR MULTIPLE-ESTABLISHMENT
COMPANIES ONLY**

Do not include as rent any payments made by the establishment to the parent company or another subsidiary of the parent for use of buildings and equipment owned by the parent company or its subsidiary. The value of these depreciable assets should be reported by the establishment as if they were owned by the establishment. Any capital expenditures made to acquire them or any depreciation charges against them should be included in the proper section. If the establishment uses building or equipment leased from other companies, but the rental payments are not made directly from the establishment's account, but are handled centrally at a company or division level, please report the share of the rental overhead charge to the establishment or estimate the share of the rental charges appropriate to the operations of the establishment.

► **Item 11A. Consumption of Purchased Fuels Used for Heat, Power, and Generating Electricity During Survey Year and End of Survey Year Fuel Stocks**

Purchased Fuels Used During Survey Year — Report on lines 1 through 8 the quantity and cost of each purchased fuel consumed during the survey year. A purchased fuel is considered to be any substance that was purchased or transferred from outside of the defined boundaries of the establishment in which it was consumed, for the production of heat, power, or generated electricity. Conversely, any fuel substance that is both produced and consumed within the same establishment, such as coal converted to coke, is not considered a purchased fuel, but instead, a raw material to be reported in item 5a.

As examples of the types of fuel expenditures to include in item 11A for the establishment's energy requirements, consider the following: natural gas burned for space heating; coal consumed to fire furnaces, boilers, and driers; purchased steam used to drive turbines or to provide process heat. Be sure to include fuel used to power delivery trucks, fork lifts, or other motor vehicles associated with the establishment; include purchased fuels consumed to generate electricity. Do not include fuel substances consumed as raw materials or feedstocks, (e.g., natural gas and fuel oil used to produce carbon black, crude petroleum used to produce fuels, etc.); report the cost of these materials in item 5a.

Report quantities in column (d) in the specified unit of measure and cost in column (e) in thousands of dollars.

Cost is delivered cost, that is, the amount paid or payable after discounts and including freight and other direct charges incurred by the establishment in acquiring the materials. Fuels transferred or received from other establishments of your company should be valued at their "economic value."

Fuel Stocks — Report quantities in column (f) for lines 1, 2, 3, 4, and 6 in the unit of measure indicated in column (c). The fuel stocks figures should represent the total quantity of unexpended fuel the establishment has on hand, including emergency reserves, at the end of the survey year. Exclude fuels that are to be used as feedstocks or raw materials. Do not include shipments of fuel on order or in transit; include only those fuel stocks physically present at the establishment's location.

Line 1. COAL — Report the quantity (short tons of 2,000 lbs.), delivered cost, and stocks of purchased coal. Include anthracite, bituminous coal, and lignite, but exclude peat (which should be included on line 7 in OTHER). In addition, coal breccia and coal briquettes should be reported on line 1. If quantities are billed in pounds, divide quantity by 2,000 to obtain tons. **Important:** Do not include coal converted to coke at the establishment's location, instead, report it as a raw material to be included in item 5a.

Line 2. COKE — Report the quantity (short tons of 2,000 lbs.), delivered cost, and stocks of purchased coke. Breeze, the fine screenings from crushed coke, should also be reported on line 3, however, petroleum coke (produced from petroleum residues) should be reported on line 7 in OTHER. If quantities are billed in pounds, divide quantity by 2,000 to obtain tons. **Important:** Do not include coke produced and consumed at the establishment's location.

Line 3. DISTILLATE FUEL OIL — Report the quantity (barrels of 42 gallons), delivered cost, and stocks of distillate fuel oil. Distillate includes grades No. 1, No. 2, and No. 4 fuel oils; kerosene; light diesel-type fuel oil; light gas-enrichment oil; etc. If quantities are billed in gallons, divide quantity by 42 to obtain barrels.

Line 4. RESIDUAL FUEL OIL — Report the quantity (barrels of 42 gallons), delivered cost, and stocks of residual fuel oil. Residual includes grades No. 5 and No. 6 fuel oils; heavy diesel-type fuel oil; bunker "C" fuel oils; heavy gas-enrichment oil; etc. If quantities are billed in gallons, divide quantity by 42 to obtain barrels.

Line 5. NATURAL GAS — Report the quantity (units of MCF = 1,000 cubic feet) and the cost of purchased natural gas. If quantities are billed in therms, divide quantity by 10 to approximate units of MCF. Carefully estimate the value of natural gas received or transferred from other establishments of your company. **Important:** Report only purchased natural gas on line 5; report manufactured gases purchased from other establishments (blast furnace gas, coke oven gas, etc.) on line 7 in OTHER fuels.

Line 6. LIQUEFIED PETROLEUM GASES (LPG) — Report the quantity (units of 1,000 lbs.), delivered cost, and stocks of purchased LPG. Include the following liquefied petroleum gases: propane, butane, propane-butane mixtures, and isobutane. Exclude the cost of tank rental and deposit fee. If quantities are billed in gallons, multiply quantity by 4.5 to obtain pounds. Report all other purchased fuel gases on line 7 in OTHER, except natural gas, which appears on line 5.

Line 7. **OTHER FUELS** — Report the cost of purchased fuels not specified on lines 1 through 6. For example, include the following purchased fuels: gasoline, purchased steam, purchased blast-furnace and coke-oven gas, wood, etc. Exclude: oxygen, electricity, or any fuel produced and consumed within the same establishment.

Line 8. **TOTAL COST OF FUELS** — On line 8 enter the sum of lines 1 through 7 for column (d). This total cost figure should equal the figure reported in item 5c.

$$\text{UNIT VALUE} = (\text{COST} \div \text{QUANTITY}) \times 1,000$$

Unit Value Ranges

Line 1. Coal	\$15 to \$75 per short ton
Line 2. Coke	\$40 to \$160 per short ton
Line 3. Distillate	\$9 to \$30 per barrel
Line 4. Residual	\$9 to \$30 per barrel
Line 5. Natural gas	\$0.60 to \$4.00 per MCF
Line 6. LPG	\$20 to \$130 per thousand lbs.

► **Item 11B.** Please refer to instructions on your report form.

► **Item 12. Method of Valuation for Inventories Reported for Survey Year in Item 7** — Provide a separate estimate of the total inventories in item 7, that were valued at cost from those valued at market. The inventories valued at cost should also be separately reported by the cost method used for valuation in lines 1a–f. For the inventories valued at market, provide a separate estimate for those always valued at market in 2b. Report in 2a those valued at market under the “lower of cost or market” option because the market value was lower than cost. For the value reported on line 2a, indicate in “Remarks” the cost method that was higher than market. For example: “FIFO.”

► **Item 13A. Status of Establishment During Survey Year** — Please complete this item fully if pertinent. Accurate completion of this item will avoid unnecessary correspondence, as well as reduce the possibility of your receiving more than one report form for the manufacturing activity at this location.

Please mark the box (1 through 7) which is applicable to the operation of your establishment during the survey year. If you mark a box from (2) through (5), please fill in the month, day, and year (figures only) the action became effective. If box (6) or (7) in item 13A is marked, please supply the name, address, and location of the former or new owning or operating company.

► **Item 13B. Company Organization (Not Applicable to Multiple-Establishment Companies)** — Enter the appropriate information if the company is owned or controlled by another company (line a) or if your company owns or controls any other company or companies (line b).

► **Item 14A. Total Value of Products Shipped and Other Receipts** — Please review the preprinted descriptions and complete the item as fully as possible. Please read the instructions on the form.

NOTE: The product class codes appear with six digits. The first five digits represent the product class; the sixth digit is used by the Bureau of the Census in our computer operations to mechanically verify the accuracy of the first five digits.

Although the instructions have not been changed from those which were previously used for item 14A, we want to clarify the reporting of imported products. If imported products (including products made by your foreign affiliates) are sold without further manufacture, processing, or assembly by your domestic plants, they should be reported on the line for “Resales” and not included with specific products made at the domestic reporting establishment. “Resales” are listed on the next to last line of item 14A.

If your company is engaged in petroleum refining, please refer to part V of this manual for special reporting instructions.

FOR MULTIPLE-ESTABLISHMENT COMPANIES ONLY

► **Item 14B. Shipments to Other Domestic Manufacturing Plants of Your Company** — Please report separately the value of products which are transferred to other manufacturing plants of your company for further processing. (Do not include as such transfers, products that are shipped to or on order from your company sales or wholesale offices since such products are then sold to customers outside your company.)

The value assigned to products transferred to other plants of your company should include not only the direct cost of production but also a reasonable portion of other costs (company overhead) and profits.

► **Item 14B. Unfilled Orders (For Single Unit Companies)** — Unfilled orders are defined as the sales value of all goods on order which have not been shipped as of December 31 of the survey year.

Include as orders, commitments to deliver under long standing agreements or other formal or informal arrangements. Do not include in the value of unfilled orders contract options or optional extensions to existing contracts which have not been exercised by the customer.

► **Item 15. Checks to Assure a Complete and Accurate Report** — Please complete this item as fully as possible.

► **Item 16. Certification.**

Part III — ANNUAL SURVEY OF MANUFACTURES ALPHABETIC PRODUCT REFERENCE LIST

In item 14A of each form MA-100 the Census Bureau has preprinted the product class codes and description of your products reported by the establishment in the prior annual

survey of manufactures year. In addition, we have preprinted the products and services that are generally made in your industry. Please review the entire list before completing the inquiry. If you produce products that are not prelisted, please refer to the alphabetic list of products below. If you cannot locate the description of any products that you produce, please enter a description of your products in column (a) and enter their value in column (c) on the form. Report separately for each major kind of product.

HOW TO CHOOSE THE APPROPRIATE PRODUCT CLASS IN THIS LIST

Listed in part III of this manual are selected products in alphabetic sequence. This list has been developed to specify most of the major products covered in this manual. According to our records, the manual(s) provided correspond to the types of products produced by your establishment(s). If you have received the wrong manual(s) or require additional manuals, please select the appropriate manual(s) listed in part VI of this manual.

If the products prelisted on your MA-100 report form do not correspond to the products produced by your company, please review the list below and:

1. Select the appropriate product(s) produced by your company from column (a).
2. Group your products and report values by each of the 5-digit product classes shown in column (b) below. A single value may be reported for all products included in one product class; however, products included in separate product classes should be reported separately. Please do not combine values for products included in different product classes. Enter a description of your products in column (a) of the MA-100, the appropriate product class code in column (b), and the value in column (c).
3. Selected product classes comparable to data reported in "Current Industrial Reports" - Selected product classes contain an indication of the comparability between the product class codes reported in item 14A of form MA-100 and the item codes on the related Current Industrial Reports Series (CIR). If you report value of shipments in item 14A for any of the product classes with a cross-reference to the CIR, you should be aware that a direct comparison is present in the report filed for your com-

pany in our CIR series. The dollar value you report for the product classes where the relationship exists should be equivalent to the dollar value reported in the item code or sum of item codes for the appropriate Current Industrial Report. If you have any questions, please write to:

Part IV - ANNUAL SURVEY OF MANUFACTURES PRODUCT CLASS REFERENCE LIST IN NUMERICAL SEQUENCE

The codes and product descriptions appearing in part IV of this booklet pertain to the major industry groups specified on the front cover of this manual. The sequence is numerical. Please refer to the instructions on your report form and/or the instructions for part III of this manual when using this section.

Part V - SPECIAL REPORTING INSTRUCTIONS

PETROLEUM REFINERIES

CRUDE OIL ENTITLEMENTS - If entitlements were purchased or sold during the year in accordance with the entitlements program (administered by the Economic Regulatory Administration, U.S. Department of Energy), the transaction should be treated as an adjustment to reported cost of materials, parts, etc., in item 5A. Adjust item 5A for each refining establishment by the value of entitlement purchases or sales generated by (or attributable to) that establishment. If the adjustment is negative (sold entitlements), subtract this figure from the value of item 5A computed for all other materials. If the adjustment is positive (purchased entitlements), add this figure to the value of item 5A computed for all other materials.

If specific book records are not available, the corporate entitlements adjustment may be allocated to the establishment level, such as through a per-barrel-consumed estimate.

Part III. Alphabetic Product Reference List

LIST OF SELECTED PRODUCTS IN ALPHABETIC SEQUENCE (a)	PRODUCT CLASS CODE (b)	DESCRIPTION (c)
