Re: Asbestos Material Hazard - Bldg. "D" Assembly

Please find enclosed, all the information I could gather from Central Purchasing pertaining to the hazard problem in Aurora during 1980. Hopefully, some of this information will benefit to resolve the Decatur problem.

The part numbers are unknown; therefore, I cannot determine the volume we use or the price per piece. The information enclosed does not state the final analysis of the Aurora problem. Perhaps Aurora Safety Department can provide additional information.

If the situation needs to be pursued further by Decatur Purchasing, please let me know.
