Dear Dr. Kehoe:

Thanks very much for your letter of January 16th concerning the problems of mass testing of urines for lead. We expect to be calling together a small group of experts in this field to discuss the program here in New York City and I shall call to their attention the comments you have made. I do recall that the word "appropriate" before urine testing was added at the time of the Governing Council discussion of this resolution--and imagine it was because of some of the difficulties you've mentioned that this qualification was added.

Again, thanks very much for your help on this.

Sincerely yours,

Berwyn F. Mattison, M.D.
Executive Director
