INTER-OFFICE
CORRESPONDENCE

MEMORANDUM TO MR. O. B. LEWIS

Replying to your letter of February 2nd, I am attaching a report from A. J. Baldwin covering his contacts with Mr. Boulton Earnshaw of the University of Pennsylvania, Philadelphia, Pennsylvania.

As facilities now stand, we feel we should not supply them with the requested fluid. However, you will note that Mr. Baldwin has made certain suggestions which if followed would probably provide safe handling of the fluid.

There is another point involved here, namely; what their tests might lead to and in this connection, we have no recommendations to make, rather, I feel this should be decided upon by our Medical Department.
