Dear all,

Just wanted to inform you that the workshop on PFAS monitoring that I have mentioned previously will be delayed until some time in the autumn as the original dates coincided with key meetings for the policy makers which were the primary target audience. New dates for the workshop will be distributed when they have been selected.

Best regards,

Fra:

Dear all,

Attached you can find a teaser for a workshop in Brussels 7-8 June on PFAS analytical methods and monitoring:

[Monitoring PFAS in Support of the European Chemicals Strategy for Sustainability](#)

Hopefully, the program will be exiting and relevant for the regulatory work on PFAS that is ongoing under different legislations.

Please circulate to anyone who could be interested in following the workshop. I intend to travel to Brussels for this event.

Kind regards,

-----Opprinnelig avtale-----

Når: mandag 21. februar 2022 10:00-12:00 (UTC+01:00) Amsterdam, Berlin, Bern, Oslo, Roma, Wien.

Hvor: Microsoft Teams-møte

Thank you all for wanting to take part in the discussions on how to solve the selection of limit values (and analytical methods) in the PFAS restriction proposal.

Attached you can find a background paper and a few papers.

The background paper is the most important document and contains a proposal for an approach to the limit values to be discussed on Monday. It would be nice if everyone has had the chance to take a look at the background paper before the meeting.

Meeting to discuss how to select limit values and analytical methods in the UPFAS restriction entry.

Please forward the invitation to any colleague that should attend the call.

Some background material will be circulated ahead of the meeting.

Kind regards,

Microsoft Teams-møte
