SUPER-TITE ROOF COATINGS AND CEMENTS

Roof Coating

A cut-back asphalt coating of brushing consistency for old composition roofs, roofs in good repair, and for use as a protective coating over metal roofs.

Containers	Approx. Ship. Wt.
Five cans, 48 per case (for use as lap cement)	49 lbs. per case
1 Gal., 6 per case	55 lbs. per case
5 Gallon	45 lbs. per case
55 Gallon	475 lbs. per drum

Asbestos Fiber Coating

A heavy bodied, cut-back asphalt coating of brushing consistency containing solvents and asbestos fibers. For re-coating old asphalt and metal roofs.

Containers	Approx. Ship. Wt.
1 Gal., 6 per case	57 lbs. per case
5 Gallon	47 lbs. per case
55 Gallon	500 lbs. per drum

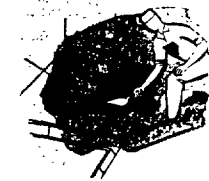

Plastic Roof Cement

A heavy bodied, plastic cement consisting of asphalt, solvent, asbestos fiber and mineral filler, of trowelling consistency. Used for patching old composition roofs, flashing around chimneys and pipe vents, and for general repair work to make roofs watertight.

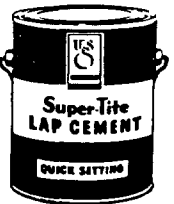

Containers	Approx. Ship. Wt.
1 lb. Cartridges for use with caulking gun, for St. Pauli-Millon only	27 lbs. per case
40 lbs., 48 per case	70 lbs. per case
2 1/2 lbs., 24 per case	70 lbs. per case
5 lbs., 12 per case	70 lbs. per case
10 lbs., 6 per case	70 lbs. per case
50 lbs., 3 per case	155 lbs. per case
500 lbs. per drum	500 lbs. per drum

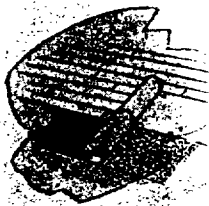

Lap Cement—Quick Setting

Brushing consistency: A fast drying asphalt liquid adhesive usually applied with a brush or mop. Used in application of 19" Selvage Edge roofing.

Knife consistency: A thick, fast drying asphalt liquid usually applied with putty knife or paddle. For sealing laps of roll roofing and tabs on shingles, and for use in "blind nailing."

Containers	Approx. Ship. Wt.
1 Gal., 6 per case	57 lbs. per case
5 Gallon	47 lbs. per case
55 Gallon	500 lbs. per drum

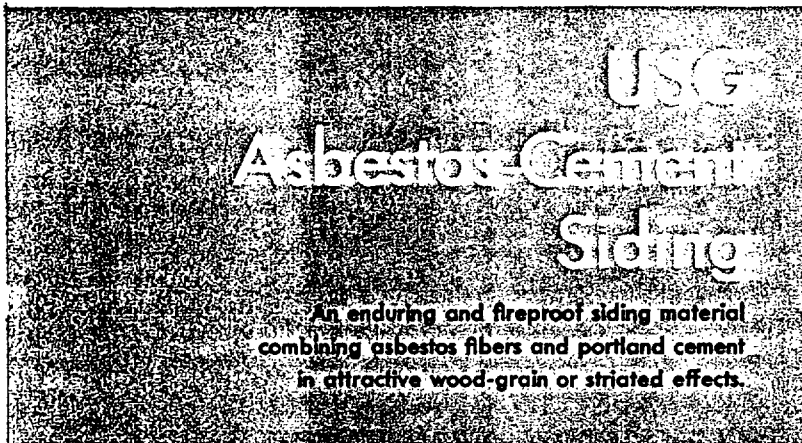

Damp-Proofing Coating

An asphalt base coating used to make brick, concrete and other masonry surfaces more water-resistant either above or below grade.

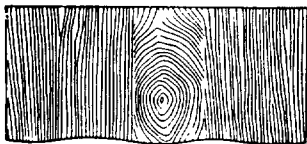

Containers	Approx. Ship. Wt.
1 Gal., 6 per case	57 lbs. per case
5 Gallon	47 lbs. per case
55 Gallon	500 lbs. per drum

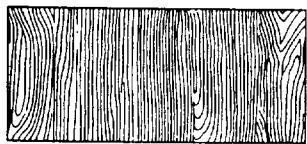

USG Asbestos-Cement Siding

An enduring and fireproof siding material
combining asbestos fibers and portland cement
in attractive wood-grain or striated effects.

GLATEX Wavy Butt Siding Shingles

Surface: Wood Grain Texture
Colors: Greentone, Browntone,
Mist Gray and Satin White
#600 style: punched, for nail-on
application

GLATEX Clapboard Siding Shingles

Surface: Wood Grain Texture
Colors: Greentone, Browntone,
Mist Gray and Satin White
#950 style: punched, for nail-on
application
#1050 style: unpunched, for use
with SHADOW-LOCK System of
application

Striated Siding Shingles

Surface: Straight Grain Texture,
with Thermoplastic coating
Colors: Cedar Gray, Canyon
Brown, Island Green, Salem Red
and Lustre White
#750 style: punched, for nail-on
application
#850 style: unpunched, for use
with SHADOW-LOCK System of
application

USG Asbestos-Cement Siding is adaptable to both new construction and re-siding. It is manufactured of a combination of asbestos fibers and portland cement which will not burn, and helps protect framing against exterior fires.

Conventional Construction—No special framing is required. It may be applied over wood, gypsum or insulation sheathing. Straight edge shingles are particularly adaptable for application by the SHADOW-LOCK Attachment System.

Economical—USG Asbestos-Cement Siding is easily and economically maintained and provides "life-long" surface.

Attractive—Indented wood-grain effect enhances the beauty of GLATEX siding. The straight-grain texture of STRIATED siding is modern, yet moderate in cost.

Large Units—The 27" long units mean faster application, fewer joints and thus tighter walls.

GLATEX Siding—GLATEX colors are fused under high temperatures into the ceramic surface, not unlike a vitrified enamel in appearance, and never requires painting. GLATEX siding retains original freshness longer than ordinarily porous asbestos-cement siding. Surface grime can be simply removed by washing with soap and water. Ordinary stains do not readily adhere to the surface.

Specifications

Dimensions: 12" x 27" x $\frac{5}{16}$ " thick

Approx. weight per square: 182#

Weather exposure: 10½"

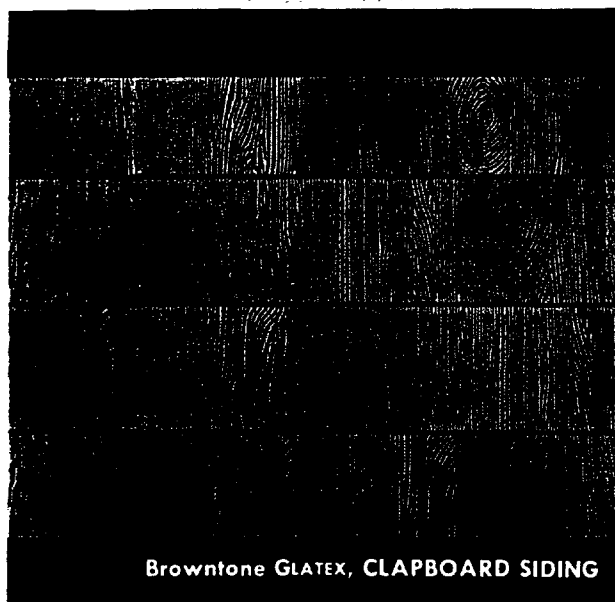

Overlap: 1½" (1⅛" minimum with Wavy Butt style)

Shingles per square: 51

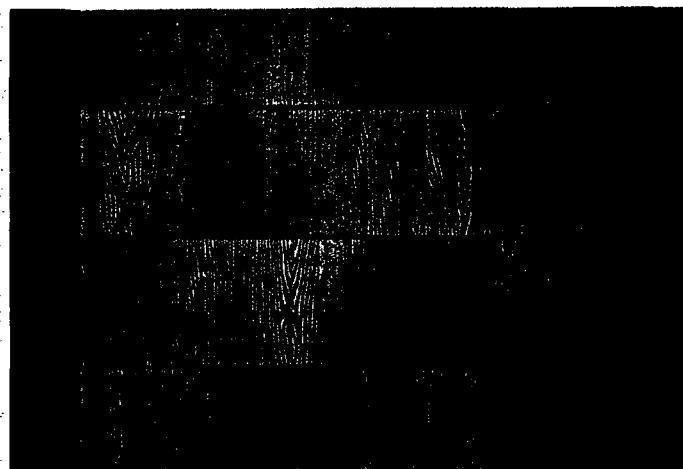

Bundles per square: 3

Asphalt backer strips are furnished with shingles. Special face nails are furnished with punched shingles only.

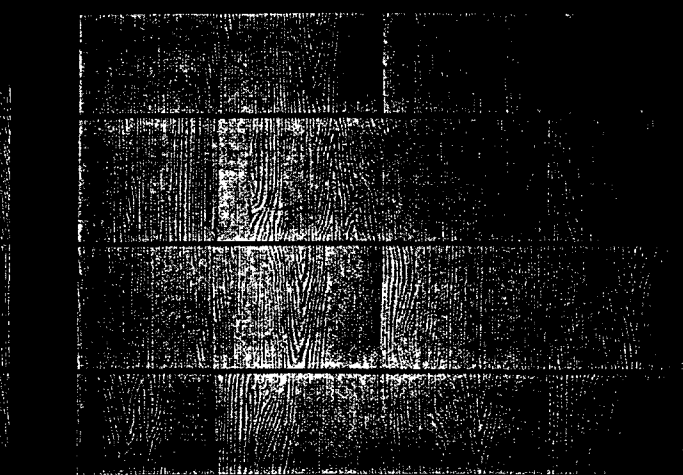

Harmonious colors, in shades
most often asked for by builders
and homeowners, are outstanding
features of USG Asbestos-
Cement Siding

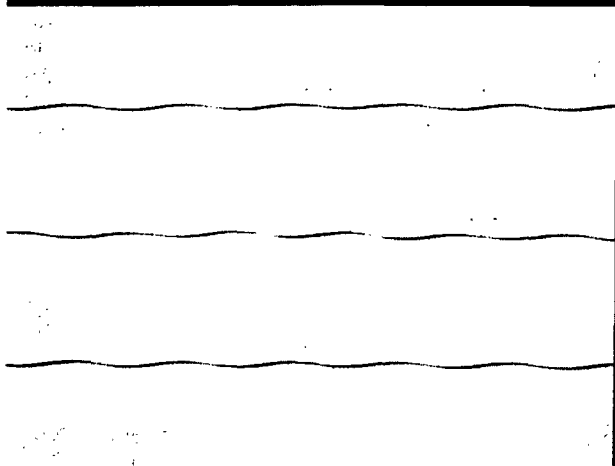

Brownstone GLATEX, CLAPBOARD SIDING

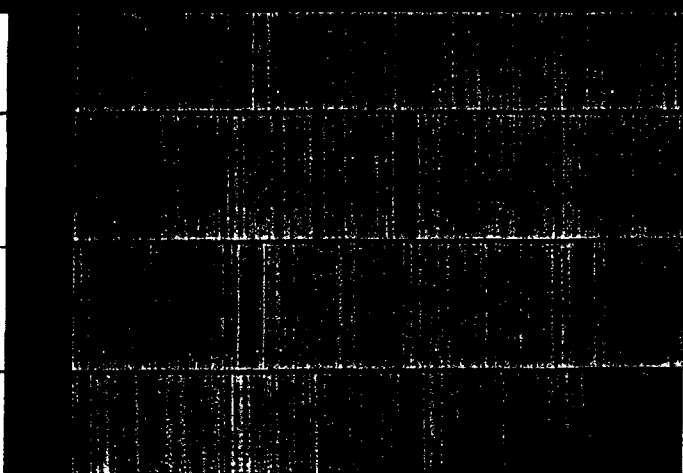

Greentone GLATEX, CLAPBOARD SIDING

Mist Gray GLATEX, CLAPBOARD SIDING

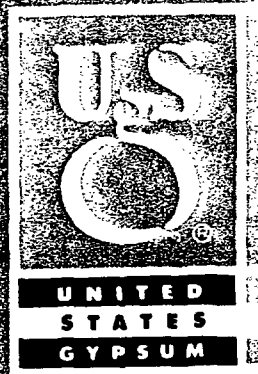

Satin White GLATEX, WAVY BUTT SIDING

Island Green, STRIATED SIDING

The colors shown in this catalog section match actual shingles as closely as possible with modern, high-speed printing methods.
