SUBJECT DHW-80 Specifications

In light of recent problems encountered with the subject raw material, the following addition and change in the specification should be transmitted to the vendor:

1. Brookfield Viscosity (addition)

Based on past results, the specification range is 280-350 cps.

2. PH (change)

This range should be changed from 8.8-9.5 to a pH of 9.0-9.5.

Would you please inform the vendor of the above. We will await your reply for the issuance of the revised raw material specification sheets.
