

Pennsylvania Furnace & Iron Company

316 North Pine St., Warren, Pennsylvania

Representatives are in principal gas using centers. Pennsylvania Gas Furnaces, Floor Furnaces, Conversion Burners, Pennco Gas Fired Boilers for steam, vapor and water, for residences, schools, hospitals, hotels, stores, and any other type of building that requires a heating plant. A full and complete line of sizes.

SERIES 6 PENNCO BOILER

The Series 6 Pennco boiler is a large capacity type boiler. It is a cast iron sectional type with all sections having hollow projections which add to the heating surface. The sections are assembled on a specially designed steel base. The design of this base greatly reduces assembling time and reduces installation costs.

The Series 6 boiler sections are hydro-statically tested to 150 psi. All boilers are constructed in accordance with the ASME code. They are also approved by the A.G.A. Testing Laboratory. Twenty-seven different sizes are available from 400,000 Btu per hr input to 4,400,000 Btu per hr input. All Series 6 Pennco boilers are furnished with completely automatic controls.

SERIES 2 & 3 PENNCO BOILERS

Series 2 & 3 Pennco boilers are the cast iron sectional type with all sections having hollow projections to add to the heating surface and efficiency. Both the Series 2 & 3 are made in either Standard or Deluxe type. The Series 2 is made for water only in four sizes from 175 sq ft EDR to 350 sq ft EDR.

The Series 3 is made for steam, vapor or water and is made in eight sizes from 96,000 Btu per hr input to 400,000 Btu per hr input.

SERIES 10A PENNSYLVANIA FURNACES

The Series 10A Pennsylvania Forced Air Furnace is constructed with an all steel combustion chamber and corrugated steel radiator. All joints and seams are continuous welded assuring gas tightness. A two-tone blue baked enamel casing contributes to the beauty of the Series 10A Pennsylvania furnace. This Series furnace is made in seven sizes, ranging from 75,000 Btu per hr input to 225,000 Btu per hr input.

SERIES 10-V VERTICAL TYPE PENNSYLVANIA FURNACE

The Series 10-V vertical type furnace is constructed with the same type combustion chamber and radiator as the Series 10 horizontal. This unit is compact and made in three sizes; 60,000, 90,000 and 120,000 Btu per hr input.

SERIES 11 AND SERIES 11 ULTRA

The Series 11 and Series 11 Ultra are newly designed forced air furnaces. The Series 11 Ultra is constructed of 12 gauge steel to comply with SUR and for burning fuel oil and gas. Both series are available in three sizes—75,000, 100,000 and 125,000 Btu per hr input.

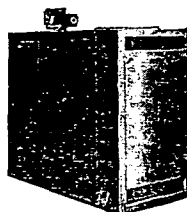

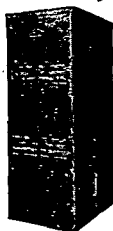

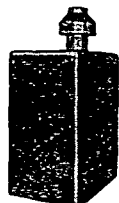

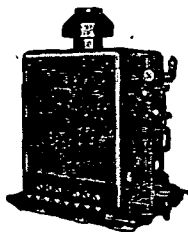

SERIES 55 PENNSYLVANIA GRAVITY FURNACES

This new line of Pennsylvania Gravity Furnaces is made in six sizes—75,000 to 250,000 Btu per hr input. A two-tone blue enamel finish casing and special designed lining which forms a dead air space contribute to the high efficiency of this unit.

PENNSYLVANIA CONVERSION GAS BURNERS

The Pennsylvania Conversion Gas Burner is made in three sizes and ranges in size from 75,000 Btu per hr input to 350,000 Btu per hr input.

MAKERS OF

AIR CONDITIONING AND REFRIGERATION EQUIPMENT
SINCE 1931

A—New Krack Komfort Masters

Quiet remote type air conditioners. Models adaptable to practically all remote comfort cooling and heating uses. Designed for ceiling or floor mounting, use with or without ducts. Can be supplied without cabinets for furred-in installation. Volume control dampers and 3-speed control on fan motors give wide range of air velocity modulation. Wide choice of coil arrangements for direct expansion, water, steam, or combinations. Sizes: 2, 3, and 5 ton. Removable filters.

B—New Krack Furnace Bonnet Coils

Convert new or existing forced air furnace duct systems to summer cooling service with minimum installation problems. Compact V-bank arrangement of air-conditioning coils. Three models have 24,000, 36,000, and 60,000 Btu per hour nominal capacities.

C—New Krack Transom Komfort Conditioners

Quiet remote type cooler and heater for multi-room offices and commercial, institutional, and private housing. Direct expansion, chilled water, hot water. Optional 3-speed fan control. Two models handle 410 and 480 cfm.

D—Krack Air Kooled Condensers

Eliminate all water problems. Easy, inexpensive installation and maintenance. Five models, 1 to 7.5 ton certified nominal capacities based on 110 F condensing temperature and 90 F ambient.

E—Krack Coils

Air-E-Fex series air conditioning coils . . . $\frac{3}{8}$ in., $\frac{1}{2}$ in., $\frac{3}{4}$ in. tube surfaces, for all sizes of installations, old or new. Patented construction features give increased strength, reduce static resistance.

Evaporative Condensers & Cooling Towers

Floor types for indoor and outdoor applications. Nine sizes 5 to 50 ton.
