UNITED STATES
PUBLIC HEALTH SERVICE

WASHINGTON, D.C.

January 12, 1937

Office of
Industrial Hygiene
and Sanitation

Dr. A. J. Lanza
Metropolitan Life Insurance Company
New York, New York.

Dear Dr. Lanza:-

This will acknowledge receipt of your letter
of January 11.

The Public Health Service has been requested to
assist the State Department of Health of South Carolina in
the work of their Bureau of Industrial Hygiene. We are very
much interested in this asbestos plant, as it is understood
that this particular plant has as good, if not the best,
control of their dust of any plant. It is not our present
understanding that a complete survey will be made, but only
an engineering study.

I am glad to know that both Mr. Jeffords and Mr.
Mitchell are agreeable to our undertaking this work. As you
know, we feel that we can not get at the facts unless we do
have the cooperation of all concerned.

Cordially yours,

R. R. Sayers
Medical Officer in Charge
