from	O.. E. Burch	location	Portland
subject	<u>ASBESTOS CAUTION LABELS</u>	date	June 6, 1974

Bill, I am attaching a copy of my memo of June 4 for your information.

The labels provided by advertising for Ready Mix Cans are not correct, and new labels will be sent you soon. These labels must go on all Ready Mix - one gallon as well as five gallon.

We will eliminate the need for any caution labels by expedient development of our asbestos free formulas.

Pails, 1000 shown

June 7, 1974

Mr. Lee Mason
The Mason Company
Post Office Box 765
Summit, New Jersey 07901

Dear Lee:

Enclosed are three Velox prints of a warning label we must show on our ready-mix joint compound pails to be in compliance with OSHA codes.

We want these warnings to be incorporated into our pail printing die as soon as possible for use on all pails produced for Chicago, Akron and Marietta. On any pails ordered from you for Acme, we would not want this warning to be shown, as their product does not contain asbestos.

These labels are to be located under and in line with Item 5 of the "Recommendations for Use" on both sides of the pail. We want the border to remain, but it should be brought in on both sides closer to the printing (as per my model) in order to line up properly.

If there will be a charge for making this die change, please advise so we can send you our purchase order.

Thank you very much.

Very truly yours,

Edward L. Aasen

Mr. William Wilkenloh
Continental Can Company
1618 S. W. First Avenue
Portland, Oregon 97201

Dear Bill:

Enclosed are three Velox prints of a warning label we must show on our ready-mix joint compound pails to be in compliance with OSHA codes.

We want these warnings to be incorporated into our pail printing die as soon as possible for use on all pails produced for Milford, Chicago, Akron and Marietta. On any pails ordered from you for Acme, we would not want this warning to be shown, as their product does not contain asbestos.

These labels are to be located under and in line with Item 5 of the "Recommendations for Use" on both sides of the pail. We want the border to remain, but it should be brought in on both sides closer to the printing (as per my model) in order to line up properly.

-If there will be a charge for making this die change, please advise so we can send you our purchase order.

Thank you very much.

June 7, 1974

Mr. G. P. O'Brien
Standard Container Corporation
3070 Presidential Drive
Suite 326
Atlanta, Georgia 30340

Dear George:

Enclosed are Velox prints of warning labels we must show on our 5-gallon and 1-gallon ready-mix joint compound pails to be in compliance with OSHA requirements.

We want these warnings to be incorporated into our pail printing dies as soon as possible on all pails produced for our use at Marietta.

The bigger label is for the 5-gallon pail die and the warning is to be located under and in line with Item 5 of the "Recommendations for Use" on both sides of the pail. We want the border to remain, but it should be brought in on both sides closer to the printing (as per my model) in order to line up properly.

The smaller label is for the 1-gallon pail die and this is to be located centrally between the seam and the face printing in the area opposite the application instructions.

If there will be charges for making these die changes, please advise so we can send you our purchase order.

Thank you very much.

Very truly yours,

Edward L. Aasen
Purchasing Manager

Mr. Jim Hickey
Armstrong Chemcon, Inc.
10330 Roosevelt Road
Westchester, Illinois 60158

Dear Jim:

Enclosed are three Velox prints of a warning label we must show on our one-gallon ready-mix joint compound pails to be in compliance with OSHA codes.

We want this warning to be incorporated into our pail printing die as soon as possible for all pails produced for Akron, Chicago and Milford but not for those produced for our Acme, Texas plant.

This label is to be located centrally between the seam and the face printing in the area opposite the application instructions.

If there will be a charge for making this die change, please advise so we can send you our purchase order.

Thank you very much.

Very truly yours,

Edward L. Aasen

intracompany memo

to	Mr. W. A. Nalbone	location	Akron, N. Y.
from	J. R. Hurd	location	Portland
subject	<u>Asbestos Caution Labels</u>	date	June 7, 1974

This memo is in response to your letter dated June 3, 1974 concerning the above subject.

PRIVILEGED INFORMATION HAS BEEN
REDACTED FROM THIS DOCUMENT. SEE
PRIVILEGE LOG FOR DESCRIPTION OF
REDACTED INFORMATION.

You asked if we as Georgia-Pacific representatives are in a position to recommend the type of approved respirators to be used to our customers. I feel we should be prepared to answer and discuss any questions dealing with our products. If we can give assistance to our customers as to what types of respirators are approved by OSHA, I see nothing wrong in doing so.

I am enclosing a copy of the Occupational Safety and Health Standards which deals with the subject for your reference if you do not already have a copy.

If I can be of further assistance in clarifying this matter for you, please contact me.

INTERDEPARTMENTAL COMMUNICATION

DATE: June 10, 1974

TO: Mr. Ed Sing

LOCATION: Acme

FROM: C. W. Lehnert

LOCATION: Tigard

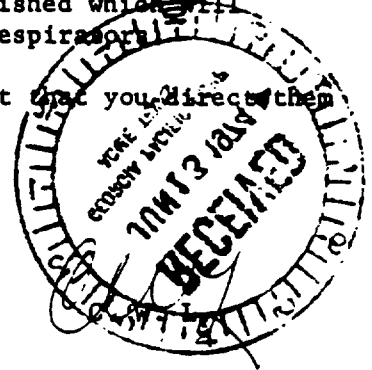

SUBJECT: ASBESTOS CAUTION LABELS

cc: Mr. O. E. Burch - Portland
Mr. T. W. Richards - Tigard
Mr. J. R. Hurd - Portland
Mr. E. L. Aasen - Portland

The labels you have been using, which you sent me copies of, comply with the OSHA requirement but do not have the additional statement concerning the recommendation for use of respirators.

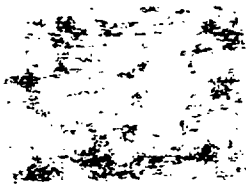

I beleive it is intended to have you continue using the existing labels until such time as new labels are furnished which will contain the statement concerning the use of respirators.

If you have further questions, I would suggest that you direct them to Mr. Hurd.
