Dr. R. A. Kehoe
University of Cincinnati
Cincinnati, Ohio

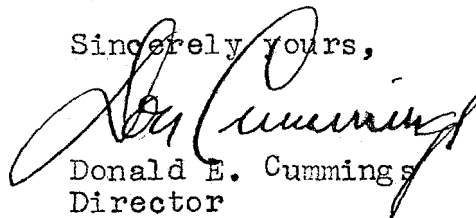

Dear Dr. Kehoe:

I have just received the Ohio Industrial Hygiene Bulletin, Volume I, No. 8 which contains an article on lead poisoning in Ohio and also an article on the basophilic aggregation test.

If I am not mistaken, you do not place a great deal of confidence in the basophilic aggregation test as an indication of acute lead absorption. I should like to have you express to me your confidential opinion on the basophilic aggregation test and also on the reason for its being sponsored by Markwith and Smith. I am interested in your comments since I regard you as one of the real authorities on lead poisoning and wish to know your reaction so that I may express it authoritatively to our students here in the University of Colorado.

I should also appreciate receiving from you any reprints dealing with your work on lead absorption or lead poisoning. With kindest personal regards,

Sincerely yours,

Donald E. Cummings
Director
