

October 10, 1934

Dr. Edw. F. Kotershall
2841 West 25th Street
Cleveland, Ohio

Dear Dr. Kotershall:

Thanks for your letter of October 8th describing the recurrence of symptoms in your patient Mr. [REDACTED]. We shall examine the samples as promptly as possible and I will report the findings to you as soon as I get them. I shall be very much surprised if they show any significant changes in Mr. [REDACTED] lead excretion, and from your description of his symptoms I should be inclined to regard his condition as due to some definite organic disease of the brain stem. I should be very grateful if you will let me know any developments in this case.

Very truly yours,

RAK:IS

Robert A. Kehoe, M.D.
