RE: CALIFORNIA PROPOSITION 65

Dear Mr. Alchimisti:

In regards to your request, our records indicate you purchase PVC compound. Based on our understanding of Proposition 65 the following information is provided.

PVC compound may contain trace amounts of residual vinyl chloride. The amount is variable but typically well below 1.0 ppm. The wire and cable compounds you buy also contain lead compounds. However these lead compounds are bound in the PVC matrix and typically not released to the environment.

Please feel free to call me at 713/531-3445 if you have questions on the above.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager
