CONFIDENTIAL

Mr. Mike Pistak
KRUMRICH

Attached is a list of 26 people who have had various types of malignancies since we started keeping records in 1949.

I would suggest you run down this list and see how many of them may have been insulators, paying particular attention to the 10 who had cancer of the lung.

Please call me as to the results of your survey before you talk to the union, as I don't want to get hokey trapped.

R. Ernest Kelly, M. D.
