

Pakhry, the distinguished Egyptian archaeologist, it was one of the saddest days of his life when he was proved right. He dearly hopes eventually to be proved wrong.

You can believe both of

escaped the notice of grave robbers in the 4,600 years since the massive burial pile was built.

The Pyramid of Chephren, guarded by the sphinx, rises from the Egyptian sands not

ber, situated beneath the base, and Alvarez could not believe this ancient pharaoh had not built secret chambers like those his father had introduced into the great pyramid next door.

out. Last month computers in Cairo and Berkeley reported there were no such empty spaces in the one-third of the pyramid "X-rayed" by the cosmic ray counters. Pakhry, who has been

ogy. The Egyptian and American scientists have spent about a third of a million dollars examining the part of Chephren thus far studied, and found wanting in secrets. They need

said. "If we pull out now, Chephren will win." The Egyptologist still does not believe cosmic ray examination of the rest of the pyramid will reveal any secret chambers.
