Brussels 3, Belgium.

Dear Sirs:

Re: TOXICITY of AROCLORS / TAMBOUR.

Below please find contents of a letter we received from
TAMBOUR PAINTS:-

"Re: AROCLOR 1254

It has recently come to our attention that Chlorinated
Diphenyls have chronic toxic properties. Reference
is made to TS/B/2189 I.C.I. Technical Service Note, to
support this contention.

We have been using Aroclor 1254 regularly for quite
some time and are now very perturbed by the above
mentioned information.

We would appreciate, as soon as possible, to hear from
you as to whether Aroclor 1254 has these toxic prop-
erties, particularly as compared to Chlorinated Para-
fins.

I assume that I.C.I. Technical Service Note,
which we have never seen, refers to the irritation which can
be caused by Aroclor. Do they really speak about toxicity?

We shall be glad to have your early comments.

Very truly yours,

HIRSHBERG BROTHERS & Co.
CHEMICALS LTD.
