Subject: HEALTH TRAINING SCHEDULE

The final schedule for this training is attached. Please discard all previous schedules.

Several minor revisions have been made in the program to minimize the holdover time requirements for shift personnel. All other program items will be completed during the training session for nonshift personnel. Highlights of the program are:

- * Covered topics include - VCM, lead, noise, asbestos, and respirators.
- * Scott air pak hands-on training will be conducted on-shift by safety personnel in the operating area. All other training will be conducted during the sessions.
- * Supervisory involvement in the hands-on portion of the training will decrease the overall time required to complete the sessions. Supervisors are expected to help safety personnel during the hands-on portion of the training. Any questions supervisors have about the equipment should be covered prior to the scheduled training.

Any questions about this program should be directed to safety personnel or your supervisor.
