# new PYDRAUL AC

COMPARISON OF INDUSTRIAL AIR COMPRESSOR VALVE DEPOSITS FROM TWO LUBRICANTS

AFTER ORDINARY PETROLEUM OIL

142 CF

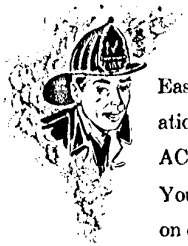

Pydraul AC is one of the latest additions to Monsanto's complete family of functional fluids. Whether you need a specialty fluid for fire resistance, premium lubricity, high temperature coolant or hydraulic fluid . . . Monsanto's specialists are at your service to consult and advise on the use and application of these chemically-tailored fluids for modern industry.

Ease your mind about flash fires and explosions in your air compressor operations. Replace ordinary, flammable petroleum oil with fire-resistant Pydraul AC... Monsanto's new lubricant tailored specifically for air-compressors. You can reduce maintenance costs, too, because Pydraul AC reduces deposits on exhaust valves and air system components. See for yourself in the pictures below how Pydraul AC keeps air compressor exhaust valves *clean*.

**LEFT:**

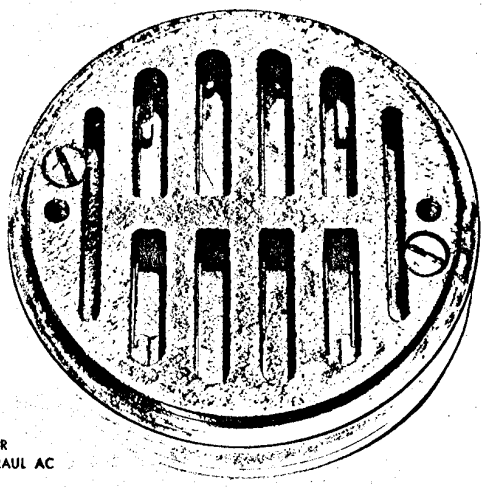

This industrial air compressor valve operated for 500 hours on premium petroleum oil.

**RIGHT:**

This industrial air compressor valve operated for 500 hours on Pydraul AC.

COMPRESSOR DATA:

" LP Bore, 5" HP Bore, 5" Stroke, 870 RPM, 100 PSI Air.
