Mr. A. G. Santighian,  
Foseco, Inc.,  
P.O. Box 8728,  
CLEVELAND, Ohio, 44135

Dear Mr. Santighian:

Asbestos-free PROFAX

Many thanks for your advice of June 6 re your  
asbestos-free PROFAX material.

Just as soon as machine capacity enables, we  
will run some trials, substituting RM.196 for 131.D and advise you of our  
experience. We may elect to assess the injection formation capacity of a  
similar recipe incorporating your X.3568 system, but including such Hedman  
as may be necessary to avoid sprue blockage.

As a matter of interest, we have found that the  
minimum Hedman content of a recipe of DR.209.G type [of which I believe you  
have detail] which is consistent with the retention of slab integrity on  
Amitec is 3%.

We will advise you of our experience with your  
recipe as we derive it, and with our thanks, remain,

Yours sincerely,

FN:MS
