U.S. CONSUMER PRODUCT SAFETY COMMISSION

WASHINGTON, D.C. 20207

August 18, 1976

Mr. Clifford H. Tuttle
President
Aerovox Industries, Inc.
P. O. Box B-970
740 Belleville Avenue
New Bedford, Massachusetts 02741

Dear Mr. Tuttle:

As a follow-up to our previous correspondence on PCBs and flammable alternates, I have asked my Associate Executive Director, Al Dimcoff, to give this matter his direct attention.

CPSC has been closely monitoring the developments concerning this compound and will be most interested in the findings as to its carcinogenicity and potential impact on the environment. Subsequent to these analyses, CPSC staff members would be pleased to meet with members of the EIA PCB Ad Hoc Committee to discuss the safety of consumer products containing PCBs and any further action deemed necessary at that time.

Sincerely,

S. John Byington
Chairman

cc: Al Dimcoff
