

xxvi *OCCUPATIONAL TUMORS AND ALLIED DISEASES*

<i>A. Chemical Agents</i>	667
<i>B. Physical Agents</i>	668
<i>a. Ultraviolet Rays</i>	668
<i>b. Radioactive Substances</i>	668
I. Physical and Technological Aspects	668
II. Occupational Exposures	671
III. Historical Aspects	674
IV. Incidence	676
V. Symptomatology	676
VI. Location	677
VII. Age	677
VIII. Causative Mechanism	678
IX. Demonstration of Radioactivity in Workers	679
X. Pathology	681
XI. Experimental Osteogenic Sarcomas of Radioactive Genesis ..	684
XII. Prognosis	686
XIII. Therapy	687
XIV. Preventive and Sanitary Measures	688
XV. Medico-Legal Aspects	692
<i>c. Roentgen-Rays</i>	693
<i>d. Physical Trauma</i>	694
Pseudoneoplastic Reactions: Traumatic Osteochondromatosis	694
Traumatic Exostoses and Ecchondroses	695
Traumatic Excess Callus	695
Giant Cellular Granuloma	696
Neoplastic Reactions: Benign Tumors: Chondromas; Osteomas	696
Malignant Tumors: Osteogenic Sarcomas	697
8. Notochordal Tissue	700

CHAPTER VIII

*OCCUPATIONAL AND ACCIDENTAL TUMORS OF THE EYE
AND ITS ADNEXAE*

1. Chemical Agents	710
<i>A. Inorganic Chemicals: Arsenic</i>	710
<i>B. Organic Chemicals: Tar, Pitch, Crude Oil, Lubricating Oil, Paraffin, Creosote</i>	710
2. Physical Agents	712
<i>A. Radiating Energy: Solar and Ultraviolet Rays</i>	712
Roentgen-Rays Radioactive Substances	712
<i>B. Physical Trauma: Pseudotumors</i>	712
True Tumors	713
