SUBJ: 1985 RESPIRATORY PROTECTION PROGRAM

VISTA

The four goals for your program at Baltimore in 1985 are good and should increase and emphasis the administration of the existing program. For clarification, I would propose the following change to the last sentence of Item 2.

"Once the minimum certification data is in the employee's medical file, the certification will be maintained by the utilization of the annual van testing program or, where employees do not participate, by the use of a questionnaire and Medical Department review."

As I mentioned, we will hopefully have the certification program out this month, with the recommended changes and Legal blessing.

Thomas G. Grumbles
