INDUSTRIAL HYGIENE ANNUAL REPORT

The Industrial Hygiene Annual Report is due in early February. Along with the data generated by Mike Brown, the report should include a brief description of any projects undertaken in 1986 which had an impact (positive or negative) on industrial hygiene at Solvents/EDC I. Projects scheduled in 1987 should also be discussed. Please inform me of any projects you feel have an effect on industrial hygiene.

We also want to formulate plans for the 1987 Program. I would like each shift supervisor to solicit ideas from his shift about industrial hygiene concerns. We would like to receive input from the operators on where they feel we need to do some testing. Please direct this information to Mike Brown or myself.
