

INDEX

PRODUCTS

JANUARY 1935 (REVISED MARCH 1, 1935)

FOR COMPANY
USE ONLY

The purpose of this Index is to place in all our principal offices and in the hands of every traveling representative of the du Pont Company and subsidiary companies, a directory showing a complete line of all products manufactured by the parent company and its subsidiaries. This Index has been arranged in sections so that it can be used for ready reference for the commodity and the addresses of the offices handling the product. A trade mark section has also been incorporated.

HOW TO USE THE INDEX

1. Trade marks, for ready reference.
(See white pages)
2. Index of all products manufactured.
(See blue pages)

The names of all products manufactured are arranged in alphabetical order. The number shown after each commodity refers to the page in the yellow section on which that commodity is listed under the department or subsidiary company by which it is manufactured.

At suitable intervals there will be sent you gummed pink slips listing new products and the department or subsidiary handling same. These slips may be attached to the inside back cover.

3. Index of various departments and companies. (See yellow pages)

This section is made up of all the departments of the du Pont Company and its subsidiaries. The addresses of main and branch sales offices and plant

locations, together with the commodities manufactured, are listed under the respective department or subsidiary company.

4. Geographical list of the various offices and plants of the parent company and its subsidiaries.
(See green pages)

This section is arranged alphabetically by state and city with the offices and plants located in each city listed under that city.

It is planned to issue new editions of this Index at such intervals as are found necessary to keep it reasonably up-to-date.

TRADE MAR
SECTION

TRADE MARKS
Important

The classification of Du Pont Products includes and trade marks of E. I. du Pont Company, Inc. or of an associate. Such trade marks are listed on the following five pages for the use of employees. They should never be used in a descriptive or generic sense because they are names for Du Pont Products. They are not generic names for the products and Du Pont's cellulose film is known as "Cellophane".

In correspondence with these trade marks, when used in text, should begin with a capital letter used to commence a sentence or be wholly capitalized or quoted.

Acids

Isobutyric
Propionic
Mixtures of Acids (classified by boiling point)
Hexoic (C₆)-technical
Heptoic (C₇)-technical
Octoic (C₈)-technical

Alcohols

Methanol (Methyl Alcohol)
Propanol (Normal Propyl Alcohol)
Isobutanol (Isobutyl Alcohol)
Amyls, mixed, Technical Grade
Higher Alcohols (Mixtures classified by boiling point)
B-22 Primary and Secondary Range 133-140
B-23 Primary and Secondary Range 150-160

DUP210008621

Alcohols (Cont'd)

Higher Alcohols (Mixtures classified by
boiling range)

B-24 Primary and Secondary (C₈₋₅)
Range 160-200°C.

B-25 (PSR) Primary and Secondary
Range above 200°C.

Aldehydes

Isobutyraldehyde

Propionaldehyde

"Alkanol" M (Series of wetting agents for
alkaline solutions)

Anhydrous Ammonia

Aqua Ammonia

Dimethyl Ether (Methyl Ether)

Dimethyl Sulphate (Methyl Sulphate)

"Dynax" (Racing fuel for use in two-cycle
engines)

"Dynol" (Racing lubricant, especially for use
in two-cycle engines)

Foam Inhibitor (Anti-foam, Foam killer)

Frothers (Frothing oils for use in ore
flotation)

Hydrogenation (Custom service on miscellaneous
hydrogenated products and
hydrogenation applications)

Ketones

Diisopropyl Ketone

Mixed Ketones - Range 100-140°C.

"Opalwax" (Synthetic wax, melting range
79-84°C.)

"Pontol" (Denaturant authorized for use in
denatured alcohols formulas CD-5A
and CD-10)

Sodium Formate

Sorbitol (Pure Synthetic)

Synthetic Waxes (Series of waxes of
physical and chemical
properties)

"Urea-Ammonia Liquor" (Fertilizer A)

"Zerone" (The Improved Methanol Ant

Trade-marks and Product Names

"Acele" - Prefix for Azo Dyes for Acetate
Ray
"Blaecan" - Pure Anhydrous Sodium Hydroxide
for sugar bleaching
"Catalite" Paste - Anthraquinone Paste
specially prepared
textile printing
"Celanthrene" - Prefix for Anthraquinone
for Acetate
"Diagen" - Prefix for Azoic print colors
Du Pont - Prefix for basic and some acid
"Gallopont" - Prefix for patented line
printing
"Halopont" - Prefix for patented line
paper pigments

Organic Chemicals
Dyestuffs

Hydrosulfite - Anhydrous Sodium Hydrosulfite
 "Leucosol" - Prefix for patented line of vat colors for printing
 "Lithosol" - Prefix for chemicals and dyes specially prepared for manufacture of lakes and pigments
 "Luxol" - Prefix for patented line of spirit and lacquer soluble dyes
 "Naphthanil" - Prefix for coal tar bases used in the dyeing of cotton, rayon and silk
 "Ponsol" - Prefix for vat dyes
 "Pontachrome" - Prefix for chrome dyes
 "Pontacyl" - Prefix for acid dyes
 "Pontagen" - Prefix for Azoic print colors
 "Pontamine" - Prefix for direct dyes
 "Rotalin" - Spirit soluble printing colors
 "Seristan" (old name "Setamine") - Prefix for colors developed for the dyeing of tin-weighted silk
 "Sulfanthrene" - Prefix for vat dyes
 "Sulfogene" - Prefix for sulfur dyes
 Sulfoxite - Sodium Sulfoxybate

Calcium

- Calcium Chloride, Anhydrous
- Calcium Chloride, Flake 77-80%
- Calcium Chloride, Liquor, 40.5° Be.
- Calcium Chloride, Powdered, 77-80%
- Calcium Chloride, Solid 73-75%

Carbon

- Carbon Bi-Sulphide, 99.9%
- Carbon Tetrachloride, C. P.
- Carbon Tetrachloride, Commercial 99.9%

Chromium

- *Chromic Acid. (See Acids)

Chlorine

- Chlorine, Liquid

Chloroform

- Chloroform, U. S. P. and Technical

Copper

- Blue Vitriol (See Sulphate of Copper)
- *Coppers, Battery
- Copper Carbonate
- Sulphate of Copper (Blue Vitriol)
 - Large Crystals, Small Crystals,
 - Snow Grade, Powdered

Copperas

- Copperas (Sulphate of Iron) Crystal,
Sugar, Powdered

Corrosive Sublimate

Corrosive Sublimate (Mercury Bi-C

Cyanides

- Copper Cyanides
- Sodium Cyanide, 96-98%
- Zinc Cyanide

*"Duclean"

- *"Duclean", 2A (Inhibited Muriatic
- *"Duclean"

A compound developed especial
quickly and economically remo
rust from interior of ungalva
iron drums

*"Dutox"

- *"Dutox" (Barium Fluosilicate)
- A non-arsenical Insecticide

Epsom Salts

- Epsom Salts (Magnesium Sulphate),
Technical and U. S.

Fertilizers

- *Hygrade Phosphate Residue

Fire Retardants

- *"Grasselli" Fire Retardants
For treatment of textiles, f
wood products, paper product

Formaldehyde

Th
Grasselli
Co.,

Glycerine

Glycerine, C. P. and 30° Yellow Distilled

Hydrogen

Hydrogen Peroxide (Peroxide of Hydrogen)
10 volume, 25 volume, 100 volume

Indium

*Indium, Metal or Oxide
A white lustrous metal, very soft and ductile, slightly heavier than zinc. A rare metal for scientific research or industrial work.

Inhibitors

*"Grasselli" 3,
Powdered, Non-Foaming.
*"Grasselli" 8,
Liquid, Non-Foaming.
Reduces acid consumption; prevents overpickling of iron and steel, and eliminates obnoxious and destructive fumes in the pickling room.

Iron

Ferric Chloride (Iron Chloride), 40°, 48°
Ferric Chloride, Crystal
Ferrous Chloride
Ferrous Sulphate (Sulphate of Iron)
*Iron Pyrites Cinder
Sulphate of Iron (Copperas), Sugar, Crystals and Powdered

Lead

*Acetate of Lead (Sugar of Lead), Flake, Brown, White
*Acetate of Lead, Solution
Lead Nitrate

Lime

Bleach (Chloride of Lime)

Prevents escape of destructive h
fumes in hot pickling of iron
steel with Sulphuric and Muri

Ores

Iron Nitrate, (Nitrate of Iron)
*Iron Pyrites, Lump, Fines

Orthodichlorobenzene

Orthodichlorobenzene

Potassium

Bi-Chromate of Potash

Grasselli
Co.

Potassium (Cont'd)

- Caustic Potash (Potassium Hydroxide)
Liquid 45% KOH
- Caustic Potash (Potassium Hydroxide)
Solid or Flake, 88-92%
- Chlorate of Potash, Crystal, Powdered
- Permanganate of Potash, U. S. P.
- *Potassium Alum (See Alum)
- Potassium Carbonate, 80-85%, 94-96%, 96-98%
- Potassium Hydroxide (Caustic Potash)
- Potassium Nitrate, Granular, Double Refined
- *Potassium Silicate Glass
- *Potassium Silicate Solution, 30°
- Prussiate of Potash (Red Prussiate and Yellow Prussiate)

Pumice

- Pumice Stone, All Grades

Slab Zinc (Spelter)

- *Brass Special
- *Intermediate
- *Prime Western

Sodium

- Acetate of Soda, Flake 60%, Commercial
U. S. P. and Anhydrous
- *Anhydrous Sodium Sulphate (Glauber's Salt)
- Bi-Carbonate of Soda, U. S. P. and Technical
- *Bi-Sulphate of Soda, Globular
- *Bi-Sulphite of Soda, Solution 32°, 35°, 38°, 40°
- Bi-Sulphite of Soda, Anhydrous (Powdered)
- Carbonate of Soda (See Soda Ash, Sal Soda)
- Carbonating Soda, for Bottlers
- Caustic Soda (Sodium Hydroxide) 76%,
Crystal, Flake, Granular, Liquid, Solid
- Chlorate of Soda, Fine Crystals
- *"G.B.S." Soda, (Bi-Sulphate of Soda)

The
Grasselli Chemical
Co., Inc.

Sodium (Cont'd)

- *Hypo-Sulphite of Soda (Sodium Thiosulphate)
Crystals, Pea Crystals, Granulate
- Hydroxide of Soda (Caustic Soda)
- *Mono Sodium Phosphate (Sodium Phosphate Mono Basic)
- Nitrate of Soda
- Nitrite of Soda, 98%
- *Phosphate of Soda, Anhydrous
- *Phosphate of Soda, (Di-Sodium Phosphate Commercial, U. S. P.)
- *Phosphate of Soda, (Di-Sodium Phosphate Duo Hydrate)
- *Sodium Phosphate, Tri Basic (See Tri Sodium Phosphate)
- Sal Soda (Washing Soda) Lump or Granular
- *Salt Cake, Calcined
- *Silicate of Soda, Solution. All grades
- *Silicate of Soda, for adhesive purposes
- *Silicate of Soda, for Paper Makers
- *Silicate of Soda, "R-B". For curing and dustproofing concrete surfaces
- *Silicate of Soda (Special Grade G4)
- *Silicate of Soda, Anhydrous Powder
- *Silicate of Soda, Solid. Lump, Sheet, Granular
- *Silicate of Soda, Soluble Powders
- *Silicate of Soda, Meta. Coarse, Fine, Regulated
- Soda Ash, Dense, Fluffy, Light, 58% and 60% Na₂CO₃
- Sodium Aluminate, Dry Powdered, Soluble
- Sodium Cyanide, 96-98%
- Sodium Fluoride, Light, Fluffy
- *Sodium Fluosilicate (Sodium Silicofluoride)
- Sodium Perborate
- *Sodium Silico Fluoride (Sodium Fluosilicate)
- Sulphate of Soda, Anhydrous
- Sulphate of Soda, Technical

The
Grasselli Chemical
Co., Inc.

Sodium (Cont'd)

- *Sulphide of Soda, Crystal
- *Sulphide of Soda, Concentrated Broken
- *Sulphide of Soda, Flake
- *Sulphide of Soda, Fused (Solid)
- *Sulphite of Soda, Crystal
- *Super-Sulphate of Soda (For stock powder manufacturers)
- *Textile Sulphate of Soda (For dyeing)
- *Trisodium Phosphate, Fines, Medium, Coarse, Globular

Soldering Fluxes

- *"Eureka" Crystal, Dry
- *"Eureka" Triple, Liquid
- *G. A. Grade, Liquid
- *"Kleanrol" Crystal Flux (For can manufacturers)
- *Special Grades, Liquid
- *"Snowflake" Soldering Salts
- *Soldering Flux, Paste

Spray Products

- *Arsenate of Lead, Powdered - "Grasselli"
- *Arsenate of Lead, Powdered - "NuRexform"
- *Arsenate of Lead, Powdered - "Rex Standard" Blue Vitriol (Sulphate of Copper)
- *Bordeaux Mixture, Powder
- *Calcium Arsenate Casein Spreader
- *Dry Lime Sulphur
- *Dust Mixtures (Copper-Lime Dust, for vegetable growers. Sulphur-Lime Dust, for fruit growers.)
- *"Dutox" (Barium Fluosilicate)
- *"Floragard" (Protects roses and flowers against black spot, brown canker, mildew and many fungous diseases and against many leaf eating insects.)
- "Kleenup" (Dormant Oil)

The
Grasselli Chemical
Co., Inc.

Spray Products (Cont'd)

- *Lime Sulphur Solution
- *"Manganar" Monohydrated Copper Sulphate
- "Orthol K." (Summer Spray for fruit)
- "Parapont", Fine, Medium, Coarse (To control Peach Bore)
- *"Sulforon" (Wettable Sulphur)
- Sulphur, Dusting Sulphur
- Sulphate of Copper (Blue Vitriol)
- Sulphate of Nicotine, 40%
- *Sulphate of Zinc, Crystals or Flake control of peach bacterial
- "Volck" (Nursery "Volck")
- Weed Killer (Atlacide Chlorate)

Strontium

- *Strontium Chloride
- *Strontium Nitrate, Crystals

Sulphur

- Roll Sulphur
- Sulphur, Crude
- Sulphur, Flour, Commercial
- Sulphur, Flowers of
- Sulphur, Rubber Makers'
- Sulphur, Superfine

Sulphur Dioxide

- Sulphur Dioxide, Commercial, Refrigerating Grade

Thallium

- *Thallium, Sulphate (An active ingredient of rodenticides and anti)

Tin

- Bi-Chloride of Tin Solution, 50%
- *Muriate of Tin Crystals
- *Muriate of Tin Solution
- Tetrachloride of Tin, Anhydrous

T
Grasselli
Co.,

DUP210008673

Tin (Cont'd)
Tin Oxide (Oxide of Tin)

Tinning Flux

*Tinning Flux Solution (Specially prepared for Tin Plate Manufacturers and other tinning operations)

*Sal Ammoniac (See Ammonium)

"Salamac"- Solid Sal Ammoniac (Bars of various sizes. For cleaning and tinning soldering irons)

"Speco"- Solid Sal Ammoniac (Bars of various sizes. For cleaning and tinning soldering irons)

Titanium

Titanium Potassium Oxalate

Titanyl Sulphate

*Titanyl Sulphate (Used in manufacture of Titanium Compounds)

Weed Killers

Atlacide Chlorate (See Spray Products)

Zinc

*Zinc Ammonium Chloride (For galvanizing)

*Zinc Anodes (For electro-galvanizing)

*Zinc, Battery Coppers

*Zinc, Battery Zinc (For telephone, telegraph and railroad signal use)

*Zinc Chloride, Fused - Solid

*Zinc Chloride, Granulated - Dry Special Grades for all purposes. For Hard Fibre, Dry Cell Batteries and other purposes.

*Zinc Chloride, Solution (Any strength to 70%)

*Zinc Chloride (For wood preservation)

*Zinc Cyanide

Zinc (Cont'd)

*Zinc Dust, Double A Grade. Trip
(For cyaniding)

*Zinc, Mossy

*Zinc (For Sherardizing)

*Zinc, Slab (Slab Zinc)

Zinc Stearate

*Zinc Sulphate, Crystal or Flake

*Zinc Sulphate

Zinc Oxide

*"Tomahawk" Brand, 35% Lead

*"Snowcap" Brand, 5% Lead
