Dr. W. E. Obetz
Industrial Commission
Columbus
Ohio

Dear Dr. Obetz:

My interest in the above patient was attracted through a report of Dr. Hayhurst with whom I have corresponded concerning him. I am enclosing herewith a copy of my letter to Dr. Hayhurst of December 2nd which explains my general point of view about him. In line with that point of view, I have urged the hospitalization and further study of this man in an effort to make a diagnosis. It is now obvious that the services of a nose and throat consultant should be obtained to establish the importance of that factor in his present illness. It is my purpose in writing this letter to urge the authorization of this consultation as an aid in the diagnosis.

Very truly yours,

RAK:is

Robert A. Kehoe, M.D.
