September 25, 1935.

Mr. Sumner Simpson, President,
Raybestos-Manhattan, Inc.,
Bridgeport, Conn.

Dear Sir:

You may recall that we have written you on several occasions concerning the publishing of information, or discussion of, asbestosis and the work which has been, and is being done, to eliminate or at least reduce it.

Always you have requested that for certain obvious reasons we publish nothing, and, naturally your wishes have been respected.

Possibly by this time, however, the reasons for your objection to publicity on this subject have been eliminated, and if so, we would like very much to review the whole matter in "ASBESTOS".

Our thought is that we could either prepare from data which we have in our files, or obtain from Mr. W. A. Godfrey of the Cape Asbestos Company, London, who is much interested in the subject, an article on the work done in England and then follow it with an article written by someone in your organization, as to the work done here.

We understand from Mr. Stover that your North Charleston plant, contains very complete dust control equipment and a description of such equipment, if you approve, would make a very interesting part of the article. Possibly even you could supply a photograph or two showing some part of this dust control equipment.

We await with much interest your reply. If there is no serious objection it would seem to be a most interesting subject for the pages of "ASBESTOS", and possibly a discussion of it in "ASBESTOS" along the right lines, would serve to combat some of the rather undesirable publicity given to it in current newspapers.

Very truly yours,
"ASBESTOS"
