Dave,

We recieved an inquiry yesterday from a WVDOT employee with questions/concerns regarding health & safety of WVDOT workers near the site working on the Rt 50 bypass project. I'm forwarding the contact name to you in Steve Opp's attached email (he called Steve). I assume it may be prudent for you to talk with him. Obviously, I don't think there are any health and safety issues related to their off-site work in the site vicinity, but we'd be very happy to work with them on an as needed basis should they venture onto (e.g., Blennerhasset Island) or very close to the site. Its possible we could designate someone from the site H&S Gp. as a long term contact.

Andrew

Andrew:

The person that Lucinda spoke to yesterday was a guy by the name of Dave Bodnar with the WV Department of Highways. Phone is 304.558.2830 and email is dbodnar@dot.state.wv.us His main concern was if there were any safety precautions that his drilling and construction crews needed to take during the construction of the new highway segment near the plant.

Thanks!

Steve
