Dear Dr. Cagen,

I am following up with LU on this topic and will come back asap to you.

Regards

Gerhard

PM

Dear Dr. Gans:

This note is a follow up to a telephone message I left with you last week and follows a brief discussion I had with your colleague Bill Toland a short while ago (at an ACC Science Policy Team meeting) regarding a rather large program in Shanghai, China that is designed to evaluate benzene toxicity in the Shanghai community.

I would like to discuss this program with you as soon as our schedules allow, with the purpose of setting up a presentation from the study sponsors
