Dr. Robert A. Kehoe
Professor Emeritus of
Occupational Medicine
University of Cincinnati
Kettering Laboratory
Eden and Bethesda Avenues
Cincinnati, Ohio 45219

Dear Dr. Kehoe:

Thank you for your kind and informative letter relative to the current situation in "C" Building of Ethyl Corporation's Baton Rouge Plant. I was pleased to learn that they are continuing with the alterations to the ventilation system as I hadn't heard from them for several months and was curious about their progress.

I quite agree that Park and Jones are very competent and well motivated toward the objectives which we hold in common. We have high hopes that the engineering modifications now underway will produce significant lowering of the lead content of Building "C" air. It would be of interest to obtain personal samples, as well as area samples, before and after, to evaluate exposures and improvements more precisely.

Best wishes,

Melvin W. First
