DATE & SUBJECT:	April 29, 1987 ASBESTOS LABELING

Discussed Industrial Hygiene Bulletin 126 on April 29, 1987 at 8:15 am with H. M. Cole and R. Benton. They have agreed we have a special situation in which labeling is not practical. M. Cole still would like us to consider marking, by color coding or whatever we find practical, newly installed asbestos to avoid unnecessary special handling expense in the future.

Ron Benton is to be our asbestos contact. We agreed to stay in contact with him on all asbestos operations.
