Subject: Shanghai Health Study - contract extension request from Applied Health Sciences

All,

API has received a proposal from Dr. Otto Wong of Applied Health Science for a contract extension for their work on the Shanghai Health Study. This extension is necessary because more manuscripts are being prepared to report the conclusions of the SHS case-control study. Originally only two manuscripts were anticipated, now there will be four. (Dr. Wong has already submitted two manuscripts for review by SRP.)

The proposal is for an additional \$36,800 plus (the already budgeted) money to travel to Munich for the 2009 Benzene Symposium for a total of \$46,880. The funds are available in the BHRC budget.

Please let me know if you support proceeding with this request for additional funding.

Regards,

Russell White
