INTER-OFFICE CORRESPONDENCE

LAN 15 1978

TO	Mr. C. J. Lowe	ADDRESS	Houston
FROM	L. Funderburg	ADDRESS	Houston
SUBJECT	Asbestos Materials Used on the Houston Plant	DATE	November 16, 1978

As you requested, research has been made to determine the types of asbestos materials presently being used on the Houston plant. A list of these materials is attached. Additional information of interest has been included which refer to locations, equipment, etc., where asbestos has been previously installed. Also included are some changes that have been made from asbestos to a substitute material.

You also requested revisions of the Maintenance General Safety Rules regarding the safe handling of asbestos materials. These rules have been revised, approved and have been distributed to the holders of the Safety Manual. A copy of these rules are attached.
