This Copy For

Your letter of June 19 above subject mentions a new blow-on type of Accoustical Plaster. However, to date we have not received a formula for same and if we do not have all of the necessary raw materials, there might possibly be an objectionable delay in shipping the trial shipments that would go into the district furnished from this plant.

Will you, therefore, have the necessary information forwarded to us.

JRU

I discussed with Abbey & told him I didn't think we should order materials for Acme until such time as we had a report from you on how it worked in St. Louis. If you are satisfied, we can order enough materials for Acme to make 6 tons as requested by C.E.A.
