

New York Safety (2)

June 7, 1950

Mr. J. S. Maynard

ESSO STANDARD OIL COMPANY
Memphis, Tennessee

On May 12 we received from our Atlanta office a letter addressed to Ethyl Corporation, Atlanta, Georgia, signed by F. L. Callicott, Esso Standard Oil Company, Memphis, Tennessee, requesting two (2) sets of instructions for the unloading, storage and blending of Ethyl fluid at bulk plants and terminals, etc.

The request was forwarded to Bill Wilson and we attach for your information a copy of his report. The several paragraphs regarding a rumor of a possible lead poisoning case may be of interest to our Medical Department.

Let us know if you wish additional information on the matter.

Yours very truly,

J. S. Maynard
