September 26, 1961

Mr. David W. Mills
Turner Brothers Asbestos Co. Ltd.
Rochdale, England

Dear David:

I want to thank you for your letter of September 15th in which you included the answers to the 15 Textile Department questions. These have been forwarded to the Factory Manager for distribution.

We are looking forward to information and the sample of Walker Chemical Company's phosphorous resin material with high temperature resistance.

While reviewing my notes, I saw a paragraph concerning some information Dr. Donaldson had mentioned regarding improvements on fiber testing. Will you ask him to send any sketches or reports that may be available on this subject.

Please convey to all your associates my sincere thanks for their cooperation.

When Dr. W. Taylor comes to the Reinforced Plastic Division meeting of S.P.I., Chicago, Illinois, next February, we will be glad to welcome him to the United States Asbestos Division, Manheim, Pennsylvania. Just let me know in advance his plans. He will no doubt enjoy meeting our men attending this meeting.

With kindest regards to you and Mr. Maddell, I am

Sincerely yours,

R. L. Moore, Director
Research and Development Dept.
