

February 1, 1994

Dear Vinyl Chloride Research Coordinators:

CanTox, Inc. has discovered a mistake in the units of one of the values reported in the comments prepared by CanTox on the ATSDR "Substance-Specific Applied Research Program Priority Data Needs for Vinyl Chloride." In section 2.1.1.5 (VCM in Water; Page 6) on the last line of the first paragraph, it reads: "...groundwater concentrations ranged from 0.75 to 0.023 mg/L (Goodenkauf and Atkinson, 1986; CSDHS, 1990)." This should actually be: "...groundwater concentrations ranged from 0.75 µg/L to 0.023 mg/L (Goodenkauf and Atkinson, 1986; CSDHS, 1990)." Please replace the enclosed page with the correction in the copy of the comments sent to you last week. If you have any questions, please call me at (202) 887-1192.

Sincerely,

Hasmukh C. Shah, Ph.D.
Manager, Vinyl Chloride Panel

CANTOX PROJECT NO.: 32090

CONTENTS OR MESSAGE:

Dear Dr. Shah:

We have found a mistake in the units of one of the values reported in the vinyl chloride document that we recently prepared for the CMA. In section 2.1.1.5 (VCM in Water; Page 6) on the last line of the first paragraph, it reads: "... groundwater concentrations ranged from 0.75 to 0.023 mg/L (Goodenkauf and Atkinson, 1986; CSDHS, 1990)". This should actually be: "... groundwater concentrations ranged from 0.75 μ g/L to 0.023 mg/L (Goodenkauf and Atkinson, 1986; CSDHS, 1990). "

I apologize for this omission and any inconvenience.

Sincerely,

Jonathan Daniels, Ph.D.
Scientist
