

1 And these were to supplement work which had
2 been done in England using a -- some sort of a water
3 spray and hose and some other technique which had been
4 used by people in Europe.

5 Q Do you recall what the result of the
6 research that was done was?

7 A One I remember was done in the
8 transportation garage, and there the -- there was a
9 sampler on the right shoulder of the mechanic in
10 replacing the brake lining, and I believe it was .45
11 fibers per cc for the mechanic.

12 And he used a vacuum cleaner, an
13 industrial-type vacuum cleaner, and the discharge of
14 the air coming out of the vacuum cleaner was just
15 under one fiber per cc. So very clearly the vacuum
16 cleaner was not suitable for that purpose.

17 Q Did your research eventually lead to the
18 development or identification of a vacuum cleaner that
19 was suitable?

20 A Yes. We made a recommendation to the
21 facilities group to look for a manufacturer of a
