

Shanghai Health Study

December 2006 – Proposal for Path Forward

I. Study Objectives

- Shell: Partial funding with clear recognition of expectations.
- Shell: Reputation, not financial
- Shell: Not to be put in this position again in 3 years

CC study stops at x cases or by YE07.

DP will be a regret

ME should focus on lymphocytic effects

Data published.

A. Where are we today?

Activity	Pros	Cons
STUDY		
Lab	Diagnostic services to Shanghai hospitals	Fudan does not want to sustain lab
	Tissue bank	Staff retention
	Database	
AMLs/NHLs	Subtypes identified	Small % BZ exposures
	1 st use of WHO classifications	Question regarding ability to reach 500 cases
Exposure Assessment		Sector analysis only
		NHL Consent forms and exposure assessments missing
		Will there be a dose response curve or threshold?
Disease Progression		
Molecular Epi		Hard to get into factories; not many volunteers
Publications	7 – mostly methods and literature review	
	New data: BIMDS, nutritional anemias	
BUDGET		

B. Where do we want to be?

II. What is realistic to fund? (Barriers and obstacles)

Activity	Fund	Funding Level	Justification
Lab transition			
Case Control			
Disease Progression			
Molecular Epi			
Exposure Assessment			
Irons T&E			
Analysis and Publication			
Symposium			
Closing Ceremony			
SRP			
ERP			
Legal			
Communications			
API			

III. Controls to support objective

- A. Prioritize work
- B. Robust QA/QC process
- C. Metrics to measure progress reports monthly, bi-monthly, quarterly
- D. Project management
- E. Final budget with an end date

IV. Path to closure

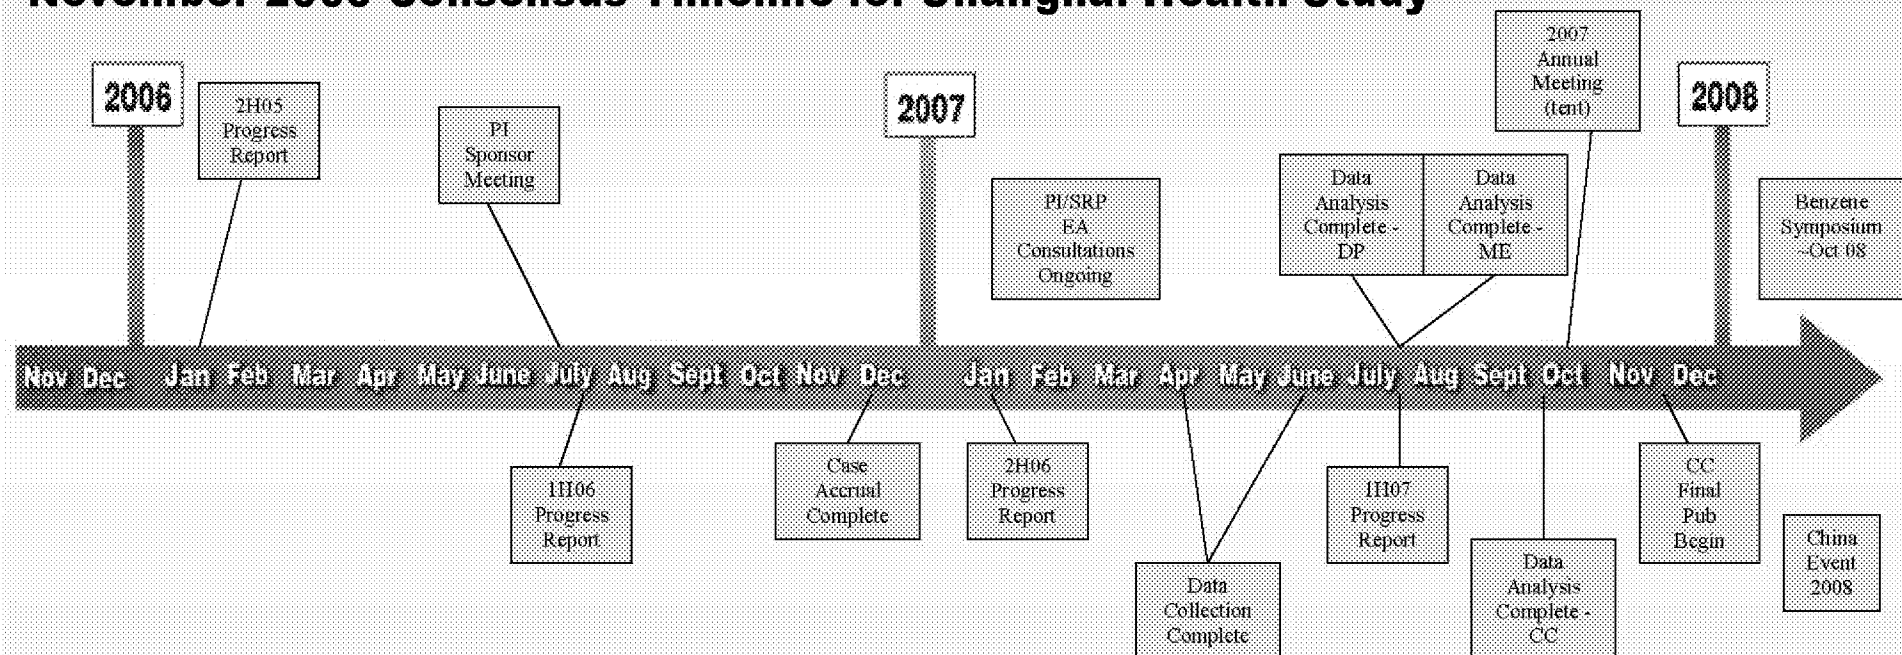

- A. Budget
- B. Time Line

Shanghai Health Study

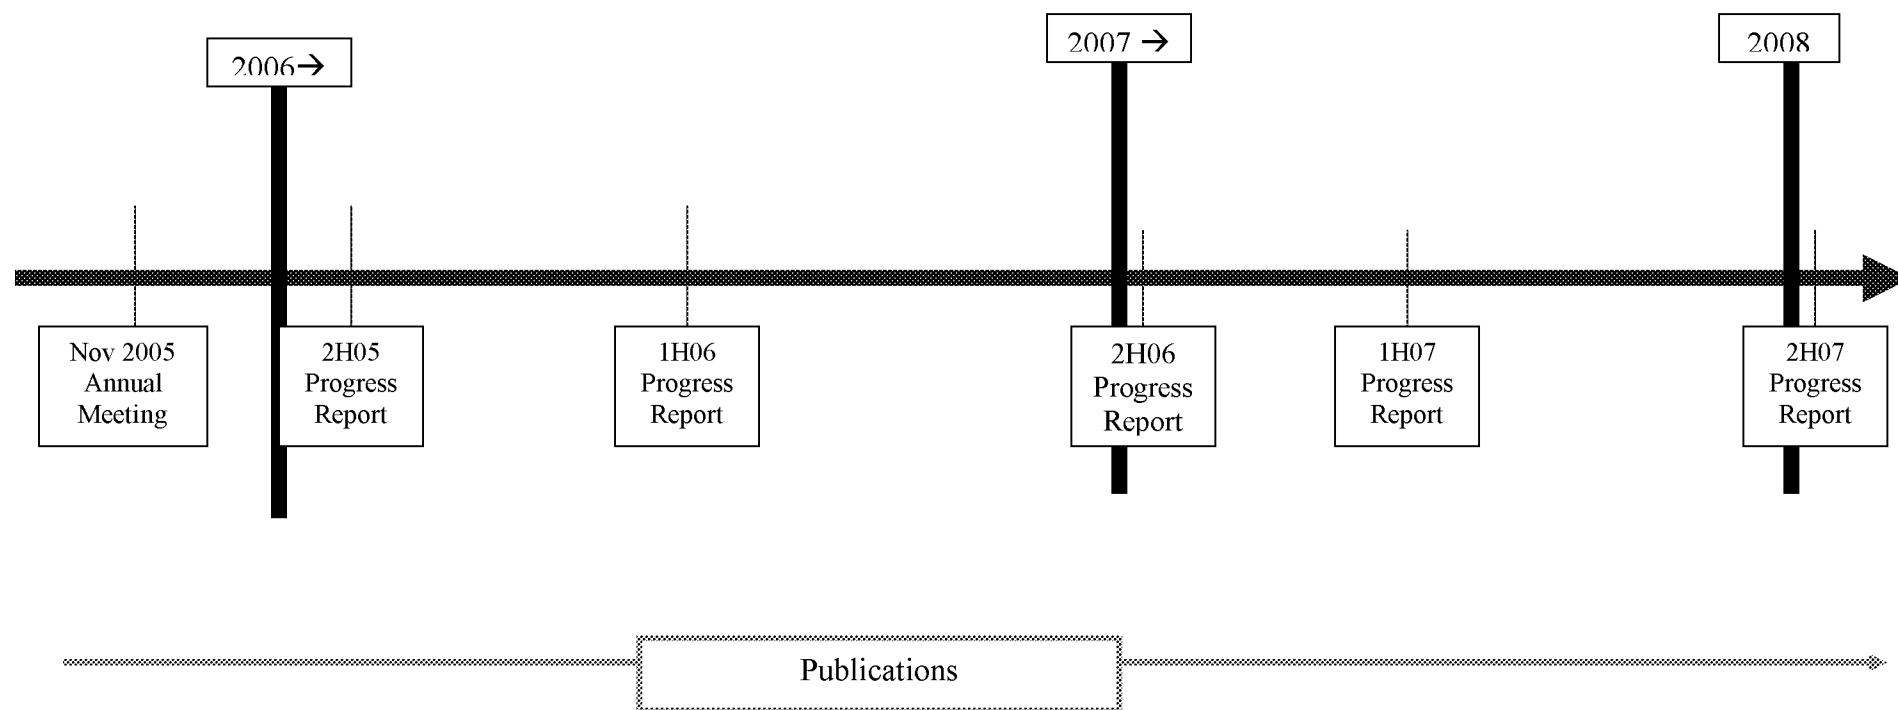

December 2006 – Proposal for Path Forward

- I. Study Objectives
 - A. Where are we today?
 - B. Where do we want to be?
- II. What is realistic to fund? (Barriers and obstacles)
- III. Controls to support objective
- IV. Path to closure

November 2005 Consensus Timeline for Shanghai Health Study

Timeline for Shanghai Health Study

Timeline Considerations

- 2006 Annual Meeting
- Benzene Symposium
- Data collection complete
- Data analysis complete
- Final Results - Publications
- Lab Transfer
-
