Health & Safety Complaint #A 101541
Statement of Fact

On 10-1-78, Management in Department 7-4 assigned employees to work on insulating disks from raw stock containing asbestos. No provisions were made concerning the health and safety of these employees by Management or Department 7-4 prior to the job assignment, as required in Part 101.5 of the OSHA Standards. Employees refused the job assignment. It was the intent of Management to assign and employ these employees to the Medical Department and given a physical examination and a chest X-ray. As a result of the job assignment and facilities provided, the employees on the Medical Unit, 101541, are 101539.

This is a statement of fact of International Plant Management's failure to safeguard the health of employees assigned to work on insulating disks on the Medical Unit.

The Union's action is as follows: The Union is going to make a list of all job assignments, specifications, and locations where asbestos are used on the Medical Unit. The Company will be notified of this list and will be required to replace the asbestos material with a safe substitute. The Union will be kept informed of these substitutions. The Union requests that the Company's Department monitor all locations where asbestos material is used. The Company should comply with the requirements of Section 101.5 of the OSHA Standards.
