PLAINTIFF'S EXHIBIT

CT-462

Our epoxy process in Hillsboro has recently adopted the use of DMF as a cleaner. I feel the personnel should be monitored on a one time basis for DMF exposure with respect to the 10 ppm OSHA Standard. The results will be used to determine future work practices and monitoring requirements.

Please supply Nick Pocock with monitoring equipment and instructions for DMF. I will supervise his efforts and see that the equipment and samples are returned as soon as possible. Your assistance will be greatly appreciated.

DIAMETHYL FORMAMIDE

NIOSH } 10 ppm, skin notation
ACGIH }
OSHA }

Silica gel desorbed with Methanol.
≤ 1.0 Lpm sample rate

ODOR THRESHOLD - 100 ppm FISHY, PUNGENT
