Mr. William B. Papageorge - B2NK

Monsanto's reply to the Holly Farms chicken feed lawsuit was carried by Associated Press.

The Air Force released a preliminary environmental impact statement saying they were considering disposal of "agent orange", a herbicide, in an incinerator in Sauget, Ill. (The reference was to our PCB incinerator at WGK.) Monsanto's press statement said we had cooperated with the Air Force in early feasibility studies, but we had no plans to handle actual disposal of the herbicides.
