

One new line completely changes the picture

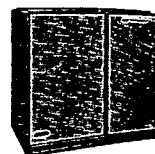

Sectry Compressors, Condensing Units, Liquid Chiller—Available in 16 sizes in capacities from 7½ through 160 tons. Design keeps field installation time and expense to bare minimum.

Climatrol Rooftop Air Conditioners—Completely packaged, compact units for year-round cooling and heating.

Climatrol Package Air Conditioners—Come in eleven water-cooled and air-cooled models.

Climatrol Winter Air Conditioners—Handsome units combine greatest installation flexibility and superb heating comfort.

Redesigned, reengineered and restyled—the new Worthington line completely changes your profit picture. Heating and cooling units of every size, shape and capacity now incorporate every major and minor advancement of the past decade. Reason: A highly concentrated 3-year development program focused our worldwide resources on the long-overdue big move up in air conditioning. Our product line now lets you outdistance competition in every market. And every phase of our technical service is reorganized and updated to match our progress in products. See the full line and how it completely changes the picture, make the big move up in air conditioning...call your Worthington Representative. See the Yellow Pages under "Air Conditioning Supplies." Or write: Worthington Air Conditioning Company, East Orange, New Jersey.

The big move UP in air conditioning

HEATING AND COOLING FOR HOME, BUSINESS AND INDUSTRY

WORTHINGTON

RESIDENTIAL AND COMMERCIAL AIR CONDITIONING CONTROLS

Proportional controls by Penn are dust-tight and splash-proof for positioning air dampers, control valves, programming devices, etc., on heating, air conditioning and industrial applications. Residential air conditioning controls include two position operating and safety controls for all heating and cooling applications.

ROOM THERMOSTATS AND HUMIDISTATS

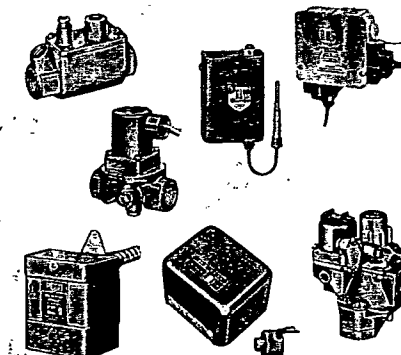

Penn offers low voltage, two position thermostats with sub-base options, including the smallest most accurate humidity control sub-base to provide single point control of all year-round air conditioning functions. Also proportional low voltage thermostats for mixed air and other commercial systems, plus the widest choice of line voltage thermostats for commercial fan coil service.

REFRIGERATION CONTROLS featuring ALL-RANGE MODELS

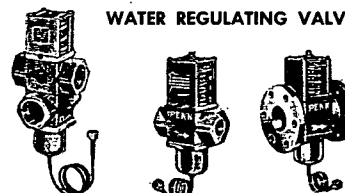

Penn's complete line of pressure and temperature controls has the capacity and versatility to satisfy all cooling requirements. Single or double pole models are rated to handle single or polyphase motors from 1 through 5 H.P. capacity. ALL-RANGE pressure controls simplify ordering and stocking.

GAS AND OIL CONTROLS

Whether it's for gas or oil-fired systems, get the exact primary control to fit your needs from Penn. Wide choice of combustion controls for oil burners... BASO gas control equipment includes automatic pilots, automatic valves, thermocouple leads and pilot burners for central heating, space heaters, floor furnaces, incinerators, clothes dryers and other appliances. Also the industry's most complete choice of remote automatic and semi-automatic ignition systems for roof-top and other inaccessible installations. Limit and operating controls for every warm air or hydronic requirement.

WATER REGULATING VALVES

Series 246 Water Valves for pressure or temperature application on water-cooled refrigeration compressors and condensers. All-range design handles both R-12 and R-22. Shown at left, 3-way Water Valve provides head pressure control on tower-cooled jobs.

Penn manufactures a complete line of automatic controls for heating, refrigeration, air conditioning, appliances, pumps, air compressors. Offices, Representatives, Warehouses and Wholesalers in Principal Cities. See your Penn stocking wholesaler.
