

Noise - (Continued)

Florida noise cars with CW2380 are rated at 8 and 9, but there is an unapplied cyclical chirp rated at 3 and 4. New caliper assemblies will be shipped to Florida and chirping calipers returned for evaluation. Viton material and Thiokol 1353 with no gasket running noise in Florida have not been satisfactory.

Arizona test vehicle noise complaints are 2:1 higher on riveted than integrally molded. Current status of IME material for production is that a 16,000 piece production run from Abex will be available approximately 2/15/78 for evaluation prior to scheduled introduction at the end of March.

Kelsey-Hayes will supply one car set of ventilated parts for testing in Florida.

NEXT MEETING WILL BE HELD THURSDAY, FEBRUARY 16, 1978, AT 9:30 A.M.
IN CHASSIS CONF. ROOM 'B'.
