Talc and the OSHA

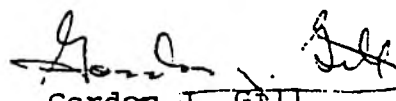

Asbestos Standard 29CFR 1910.1001

Cyprus Industrial Minerals Company's Montana talc based products are considered to be free of asbestos as defined by the OSHA Safety and Health Standards (CFR 1910.1001 (a)).

Although our California talc based products generally show no asbestos minerals at the lower limit of detectability by X-ray diffraction, they may occasionally show trace (0.1%-0.3%) amounts of tremolite. Our program of continuing checks of airborne dust at all Cyprus manufacturing plants show negative results for asbestos minerals including tremolite, thus assuring compliance under the standard outlined under 1910.0110 (2) which was effective July 1, 1975.

We attach a list of Montana and California talcs for your reference and suggest that this letter be kept with previous correspondence on this subject. As new regulatory data is published we will provide further clarification.

Sincerely,

Gordon J. Gail
Technical Director

GJG:rh
attach.
