PROJECT Extras to Silica Handling System

LOCATION El Paso, Texas

We propose to furnish labor and equipment to install the following items in your Silica Handling System for $2166.00:

1. Top and middle angle handrail to be welded to verticals on west side of truss at conveyor.
2. Formed plate to be installed to fill gap between crating and verticals of truss.
3. Angle handrail with angle posts to be installed at each end of the structure beyond the trusses.
4. Install walkway on each end beyond trusses.
5. Set stairs & platform on south end of structure as shown on revision of your drawing E12379 B.

Material to be moved into job site by others.

Respectfully Submitted

P. O. Box 1111 — PROJECT Silica Handling

El Paso, Texas — System

LOCATION El Paso, Texas

We propose to furnish labor and equipment to install the following items for your Silica Handling System for $14,686.00:

1. Structural steel framing for main conveyor and for conveyor No. 33.
2. Conveyor support channels.
3. Silica bin.
4. Chutes.

We further propose to install the two preheaters with stacks, manifold and burners for an additional $3,290.00.

This quotation is based on the following conditions:

1. We will move preheaters and conveyor steel from present stockpile to erection or installation sites.
2. Plate sections of Silica bin to be moved to approximate erection site by others.
3. All wires and other overhead obstructions to be moved as needed by others.
4. Existing ground to be levelled as needed by others.
5. Power lines that are dangerously close to hoisting equipment or hoisted steel to be killed during erection.
6. All material (except welding rod) becoming a part of the finished installation to be provided by others.

Respectfully submitted,

G. R. Hatch
